Thread: [Yeezy Boost 350 V2 Drop Cart Services \[LIMITED\]\[CHEAPEST\]](#)

Quackles - November 22, 2016, 2:14 am

For cheaper backdoor carts please refer to this thread:

<https://hackforums.net/showthread.php?tid=5472130>

Please read the whole thread before contacting me

More Information

Our services cost \$98 USD BTC per cart/colour

What is a cart?

Spoiler ([Click to View](#))

A cart is when someone adds a product to your basket on your behalf. It's safe and efficient, will save you from waiting on the splash screen and waiting in queue and give you the best chances possible of coping Yeezys.

Do you go first?

Spoiler ([Click to View](#)) No, you must pay the full price beforehand.

Are your services safe?

Spoiler ([Click to View](#))

Yes, my service are perfectly safe - there are no risks.

How do you provide these services/cop?

Spoiler ([Click to View](#))

I have a very good dedicated server and use the best proxies based in your location, along with using a bot known for its success named AIO Bot. I use one proxy per task and don't use a proxy for more than one cart.

What colorway can you get?

Spoiler ([Click to View](#))

I can do any of the 3 colourways releasing: Red, Copper or Green.

How many colourways can I cop?

Spoiler ([Click to View](#))

You can cop all 3 this time round, but we will only sell you 2 carts, not 3. You can choose a maximum of two colourways from us.

What do I do after paying you?

Spoiler ([Click to View](#))

I will request an adidas login from you, you can make a brand new one for me to use to cart for you. You have to make sure your address is on it, I will then instruct that you don't login or do anything with the account till I tell you to. I will add tasks to my bot with your account details along with ask your size and what colourway you wish to cop.

You will receive my private business skype, and will be in full contact with me till the point of you checking out.

You will have to make sure you're active on the time of release, I will tell you when its added to your cart and you will login and checkout as soon as you can, you have 15-20 minutes reservation time on the Yeezys.

Will I receive a refund if you fail?

Spoiler ([Click to View](#))

Yes, you will receive a full refund for the price of your cart; only if I fail to cart. This refund will be processed within 24 hours after the release and sent to the same BTC address as you sent it.

Why should I use your services and not someone else's?

Spoiler ([Click to View](#))

Mine is likely to be the most cheapest, I provide 24-7 support till the point of you checking out and I'll make sure you cop this Yeezy release. Other people are fine to purchase from but I'll always have the cheapest price for carts.

What countries can you do?

Spoiler ([Click to View](#))

Currently focusing on the UK but will do US and also other countries (on request), depending on where you are I may need to charge you to pay for proxies also.

Please if you have any other questions, contact me via message. I'll reply to you as soon as possible, probably within a few minutes in most cases.

Always happy to help.

Any comments regarding going first/mm will be ignored, yeezmus is amongst us and I'm not dealing with the backlash of me stating payment upfront. Thanks

Forgot me for being a noob but isn't the drop time at 12 tonight? For UK time. Thanks.

It's fine my dude,

The drop releases on Adidas website at around 8am.

Other websites release throughout the day, some at midnight but usually throughout business hours due to the amount of traffic generated on Yeezy releases.

Take care.

Asst. Regional Manager - November 22, 2016, 2:40 am

Wouldn't it be too late if you were to add them to the cart and have the other person log in and check it out themselves? Last year I did these with the 350s and I had a pair in my cart but was gone after awhile. Page wouldn't load therefore causing me to miss out on them.

Hi,

Recently Adidas introduced a new feature which reserves the item in your cart for around 15 to 20

minutes.

This makes cart services possible, you just don't login to the account till I give you the all clear, I'll be up throughout the whole of the drop to assist and talk to you till your services are rendered via Skype or even HF.

Thanks for your time, have a good day.

Asst. Regional Manager - November 22, 2016, 2:47 am

I'd do this but I'm in US :p

Also no offence I don't really have trust in the service but that's just me.

If I were to do this I would use a MM for him to hold the BTC then release to you once I've confirmed the purchase.

Sorry my broski, but I'm only doing payment before hand, please checkout Cash Overflow or Instagram services they may be doing payment after checkout.

You'll have money returned to you within 24 hours (but will be to the same BTC address) if unsuccessful.

I appreciate your time, good luck copping tomorrow.

Merry Yeezmus

Don't get in too late my dudes, lmk

Hello, cheers for the query.

Regarding your query, I think you're a bit confused this is a Cart service.

You provide me adidas account details I get the shoes in your cart, you checkout and you're sorted.

I'm supporting US and UK mainly, so yes.

Let me know.

Cheers,

Thread states twice payment upfront my dude, I recommend Cash Overflow or Instagram's services if not, think one of them does payment after, not too sure.

Stay safe.

Looks fishy to me. You're not investing anything, so there's no reason to not use a MM.

DWC guys.

So because I take upfront payment and you query about it once it's been stated twice in the thread it's a scam. That's great, you should of inquired regarding proof this service can be rendered by myself.

Let me provide that for you.

Proof of ownership of bot that is used to cart/auto-checkout, along with dedicated server <- <http://image.prntscr.com/image/ed270f1b65284ad59ba103591d050f0f.png>

Proof of Yeezys from v2 drop <- <https://i.imgur.com/cdoDyg8.png>

Will happily provide physical photos of the trainers from last two drop (being v2 and infants), also selling my infants on a separate thread along with receipts/invoices for them.

Thanks for stating it looks like a scam though, helped me prove otherwise to other people who may

feel that way.

I've also recommended two other services that do similar services to you, I'm not trying to push you into buying. Next time please ask for proof or anything that services can be rendered.

Also working on backdoor (needing sitekey when release drops as it'll most likely change so I can offer even cheaper services and open up to places like Netherlands, Australia and Finnland.

Please anyone else thinking of contacting me about any other type of payment do not, the thread states payment method and upfront payment with a refund processed within 24 hours of the drop if failed.

Good luck tomorrow all.
Best Regards,
Quackles

Proof of a bot does not mean shit. Plenty of people with bots still can't cop. I hope I'm wrong, but this seems a tad bit fishy. You still lack the reasoning behind the refusal of using a middleman.

Then them purchasing a bot to begin with was pretty stupid, probably due to not having the best

proxies anyhow, response time could mean even the slightest bit of difference with Yeezy drop.

I don't need a reason, if the thread states I'm not twice and you still query regarding it then that's on you, but calling me a scammer because you feel this is fishy isn't on, it just makes it difficult on my part.

I've never not done pay first for anything here and don't think I'm planning to anytime soon, nature of this business with me is that I'll be busy throughout the whole of this making sure everything is functional and going correctly, I do my best to provide quality support while working on making sure the customer receives what is paid for.

Next time please word it better than calling me out to be something that is just a assumption.

I edited the post to stating fishy about thirty seconds after I posted. Again, no reasoning behind not using a MM. There isn't any possibility of being scammed with a MM, and you will still get paid for your service once it's rendered complete.

I'll stop posting here. Feel free to discuss this via PM.

Oh my lord, I'm not doing any type of exit scam, I've applied for multiple groups throughout the last day or so for christ sake. Me taking payment upfront like every other thing I've sold here isn't crazy at all, I've been doing payment upfront since I joined the community.

If you got a middle man for this it would probably make you a lot more trustable

Thank you and good luck on copping tomorrow.

When you deal with an issue calmly yet people still continue throwing the same rubbish at you as if it'll change your mind on how to operate your services, please stop. Thanks.

Will be using the backdoor once sitekey is released for the countries, think Australia is first, as I only support UK and US on cart services.

Nice thread.

People are literally commenting non-sense and don't know anything about 1. Adidas 2. Bots 3
Yeezys

Also what are the speeds of your proxy?

This has to be the cheapest ATC i've seen on any sort of Yeezy release.

Also would you do these for the bapes? Or any other releases coming in the future with adidas?
I'm thinking of the NMD pks that they may be releasing.
