Thread: [Backdoor carts Yeezy Boost 350 V2 Drop \[WORLDWIDE\]\[LIMITED\]](#)

Quackles - November 22, 2016, 7:43 pm

I'm trying to do worldwide, please feel free to ask
This will be a small and [Quick Thread](#).

Anyone from any country who is wanting to cop, please message me for my skype.

Backdoor carts will randomly become available at times of launch of Yeezys in different countries, this includes netherlands and most countries in Europe and most likely US.

Just message me stating your country and your skype and I'll add you and confirm my skype to you ASAP, any attempts to scam me will be locked down asap.

]

You can cop any colour and any size, I may only sell one colour cart but you can request me to cop two colours (\$80 BTC PER color)

Spoiler [\(Click to View\)](#)

I'll simply ask you for an adidas account to cart via (provide me both color and size), you don't login till I say the service has been complete, you will be messaged near instantly at the time of them being carted on Skype or HF. You have 15 minutes to checkout. Once checked out you will pay BTC.

Please read my thread about carts overall, all the information in there will stand but backdoor carts will be crowded and fast, \$80 BTC per cart, you pay after checkout if you're a trusted member or you go first if you're not.

Giving OP a chance, I'm in the UK, let's see how it goes. Should be able to let you US guys know if it works or not before they drop over there.

CapsBruh - November 22, 2016, 8:03 pm

I'm in Canada, so three hours behind most parts of the US. I work at 6am, can you do auto-checkout for me? Will PM you my Skype.

I don't provide auto-checkout, please check out Cash overflow's or Instagram's services, they're good too.

This guy is very quick at communicating. We had a previous misunderstanding; however, we both have patched that up. He is a very helpful guy, I would recommend hitting him up if you plan on copping a pair.

why pay basically \$100 on a back door when they're already flopping at \$550 lol.

They haven't even released yet, the market is crazy, depends were you go for them.
With that being some people want to cop for personal use, giving a fee of \$80 to cart and along with retail price is a lot of savings.

Literal - November 22, 2016, 8:45 pm

If Instagram doesn't get back to me in a few hours, I'll def purchase

Sure but I don't deem you trustworthy for me to go first, please wait for a vouch or pay beforehand, funds will remain in a BTC account till completion of cart if so.

For personal gain many should be able to cop manual.

But I'm just saying \$300+ w a back door is eh.

Homie is hooking me up \$80 for a auto checkout

Quackles - November 22, 2016, 10:30 pm

Today is the day boys,
if you want your carts, hmu asap. Sorting an order list to get through today, this is not guarantee hence trusted people get to pay after cart, untrusted members will pay BTC and it will be held into my BTC, you'll be able to see blockchain address to see if the btc has been moved or not.

Quackles - November 23, 2016, 1:27 am

Currently unable to cart, not even my bot is letting my cart getting access denied.

Not too sure about other services, but looking into it and will update peeps who have reserved from me. Stock is going down slowly

zCamzy - November 23, 2016, 1:37 am

Adidas website is rather fucked atm too, it's been so for roughly the past 20 mins. I've been seeing multiple reaching the cart stage and being 'blocked' by adidas upon attempting to check-out.

Yup, same here... My tab which I had open since 8:40am crashed like 20mins ago and I can't get anymore tabs to even start loading on my computer anymore. Managed to get a tab open on my phone 5mins ago but now that I've lost my spot I've given up pretty much all hope. Maybe they'll be a size 13 waiting for me lmao

edit: nvm, site's working again in my Chrome but all hope is still lost probably

Quackles - November 23, 2016, 2:08 am

The user who has purchased via BTC beforehand has been refunded.

Currently having issues with carting on Adidas Europe, along with my bot giving me Access Denied

right before it was due to cart.

If anyone in US etc are interested in a chance, please lmk, I'll attempt my best to get that working by then.

Thread closed till then.
