What is SharePlay?

SharePlay is a process where you give a friend / person close to play with you / to play the game that you purchased without having to download,

The man you let him play with you / game play the game like he really the same room with the same console.

SharePlay is designed to help you in all kinds of tasks in games,

That is if you are stuck at some point you can do SharePlay If your friend you could pass the stage.

SharePlay also allows playing online game mode.

The SharePlay limited to only 2 people !.

The SharePlay limited to 60 minutes, but after 60 minutes you can do it again.

The man who received the SharePlay can play the game without having to download it !.

SharePlay requires a subscription PS + Who makes the SharePlay

How do you begin to SharePlay?

You need to be a game where you want to make SharePlay,

Then click the Share button located in the DS4,

Then choose "Start Share Play".

Then pop up when you check the friend you want to do it SharePlay,

When the friend went for parties you pay attention to the top left click on the timer timer and click on "Give Controller To Visitor"

Then a window will pop up with 2 options to choose -

1. Allow Visitor To Play As You - your friend will play for you and continue where you left off playing.

2. Play a Game Together - your friend to play with you together.

Then you're with a friend on a party he will receive an invitation, when he will enter the order in which he will choose to do it SharePlay.

Video demonstrating the steps -

When you can not do SharePlay?

You can not do SharePlay when you do not have a PS +.

When you can not get SharePlay?

You can not get SharePlay when your speed is 2MB or less (including 2MB).

When SharePlay necessary?

SharePlay necessary when you're stuck at some point,

Or when your friend wants to try the game,

Or when you want to play against your friend / with your friend.

I dont have fast internet too .

but when i was living with my parents i just unplugged every internet thingy on the house and i was able to shareplay.

I don't get why it's so bad on my ps4 though I should be able to shareplay. Don't think it's my ethernet cable I've switched them out before.
