What's the point of this? You can change your Username to whatever you'd like on Steam. Regardless, thanks!

You learn to read. It's a Steam ID checker for untaken OG names. Which you can change your name to whatever you'd like. So there's really no point.

Just run it in VMWare if you're suspicious :)

but yeah, if you wanna wait for someone who knows about viruses to inspect it, that's up to you :)
