Thread: [gambling cpa 6 days 5 hours work total killer epc's](#)

**Rod\$** - November 24, 2016, 4:42 am

Cost: 5 hours of my time, some proxies and accounts = \$10  
I spent less than \$10 and 1 hour a day to get these results!  
If i can do it you can too...

Results

<https://puu.sh/ss0UD/95e4c3f107.png>

Time to scale

Advice:

Always split test your angle!

Your angle is how you present your ad to the user for example:

If you're promoting dating for woman, you might have an ad related to men with bears, men that work out, men with wealth and tall men. It's key to split test angles like this and track the results properly weather with pixels or simple subID's in your network

Always be persistent with cpa!

You try something for a whole day and it doesn't work? so what come back and whine after you try something for a week or a month and it's not working, most of the times the method works, it's just your way of promoting doesn't, the traffic online is absolutely huge you can sell anything to anyone!

Stop jumping around!

Pick someone and stick at it, newbies have a tendency to jump around when something does not work for a day or week, you have to pick 1 traffic source, 1 vertical and stick with it (vertical=niche e.g gambling, dating, skin car, diet pills, sweepstakes, app installs, bizzops the list goes on forever

Lastly..Stop reading threads like mine and start doing!

Action is the key to cpa. I could sit here and think about 100 methods to make me rich but unless i actually put in the WORK and take action nothing will happen

I wish you the best of luck in cpa and escaping the reality of go to school, get a job, get a mortgage, have kids, retire and die. Yolo couldn't be more appropriate

Nice earning mate, all the best! :)

**akaswizz** - November 25, 2016, 6:10 am

what CPA network do you use?

Also curious on the network you're using. Have never seen it before.

Im not going to share it out of respect for the network, they don't want a flood of 15 year olds but similar sites include clickdealer and convert2media
