Thread: [Money making methods! \[Greyhat and Blackhat accepted\]](#)

Simplelife - November 24, 2016, 6:45 am

Hey guys, I'm looking to invest into something that I know will make me my money back. I don't care if it's Greyhat or Blackhat as long as it's not like robbing the Feds lol. Anyways if you got a way to make money and it works my budget will be huge!

I would like to do this deal by using a MM such as Minimalist or V for Vendetta to hold the funds until I make my first profit. So I would put the funds on hold with V for Vendetta or Minimalist you would tell me the method and once I verify that it actually works and make my first profit the funds will be released to you once my first profit is made. If you think you got something please PM me or post info here such as cost of the method and potential profit :)
