Auto-Payment System by FanaticDev

Ever want to optimize your sales? Make it easier? Then this is for you!

Information:

Have you ever wanted to optimize sales by getting the product and HWID activated and EMAILED to the buyer INSTANTLY after they bought it? Want it done securely? This is what we offer with our FanaticDev APS (automatic payment system). We support difference packages with prices (INCLUDING DIFFERENT DOWNLOAD LINKS AFTER) and much more! The person does not get a single link to the download! It's emailed as an ATTACHMENT after they verify their HWID! This also prevents the 1 penny trick and much more, with ultimate security!

Why is it so special?

Because it is totally different than any other on the market.
What it contains is the following.

It's totally different than anything on the market! This is a UNIQUE payment system.

These are the "features" -

They pay, and PayPal checks for fraud, and then if verified, creates an activation code.

They are sent to their PayPal address an activation link that will only work after the PayPal has been checked and verified.

They go to the URL and input their HWID and other information.

They are again emailed with a unique 1 time download link. This can only be downloaded ONE time.

I'M INTERESTED BUT HOW DO I GET IT? OR I HAVE QUESTIONS!

Prices will be discussed via MSN. So will any questions or you can post here.

Contact [Fanatic](#) at Fanatic@hackforums.net

Payment options -

PayPal
Liberty Reserve

Disclaimer: I am selling for [Fanatic](#) and in a partnership type thing, which is available to anyone selling anything other than fraud [here](#). If you are interested, look at it, and let me know.

TeemoProd - July 16, 2010, 10:37 pm

Thanks for posting Yin!

Buy ASAP!

iDarky - July 16, 2010, 10:37 pm

WoW That Looks GREAT !

> Can i use this for my bot sales :D

Possibly, would have to discuss over MSN.

nitrateoxide - July 16, 2010, 10:48 pm

Sounds great, when I get some funds im defs buying :)

Yin - July 16, 2010, 10:51 pm

Note, PayPal is the option that it is automated for.

Do you honestly believe if someone has got someone else's PayPal information albeit by whatever

method, then they do not have access to that persons email? This system will only make shit quicker/easier to fraud, I mean with no human verification at-all its a joke. Easy as pie, login to the persons PayPal send payment (using your payment system or whatever), login to that persons email - grab this unique code and continue with the process.

If you ask me my opinion then this is definitely 1000% MORE susceptible to fraud and will only make the 'fraudsters' job easier/less time consuming.

Yin - July 16, 2010, 11:22 pm

Some of the time they don't. 1000% more is a huge number.
