Sorry if I mislead you in the OP in any way.

For this service you would send the ID's to ME and I would report them with the accounts I own. I simply report them for you and get them banned.

With the packages, I would just keep track of how many people I've banned for you.

Here's another one I was asked to do.

<http://steamcommunity.com/id/ayyyImaoxdlolxd/>

Bezo - November 27, 2016, 9:05 pm

Most recently banned account: <http://steamcommunity.com/id/hl3dev/>

Also added a few perks with pkg 3 and 4.

1 Slots remaining, 2 were taken from other forums.

I don't judge btw, whether or not you're a legit player reporting hackers or hacker reporting hacker XD. I don't discriminate.

Adding more slots once I add more accounts.

Commends should not be bannable. Haven't seen anyone legitimately banned by only being commend bottled.

Thanks for the vouch, Still selling reports.

Keep in mind all a report does is send the account to the overwatch queue. It does nothing vs legit players.

That's why spinboters will be 100% banned, and closet cheaters are a 50% of ban.

Nah, I have the website up but it's only for 1 user.

The person I paid is unavailable right now due to exams. So I've been tampering with the code when I have time to try to get it up and running.

I don't know much about web developing/php/css, a lot say it's easy but I don't have the time to do it.

Just waiting for either the new guy next week, or the guy I originally paid.
