Thread: [\[TUT Spread \] For skids No Crypt !](#)

vfragtasticv - November 25, 2016, 12:29 pm

Hello hackforum members.

I want share method what I used when I didn't have "crypter".

First step :

Spoiler [\(Click to View\)](#)

Secondary step:

Spoiler [\(Click to View\)](#)

Third Step:

Spoiler [\(Click to View\)](#)

Four step.

Spoiler [\(Click to View\)](#)

Scan time :

Spoiler [\(Click to View\)](#)

You just rename your server.zip to like "Exploit V4"

In your server.zip you can add fake ".dll files " Fake " Folders "

Create video on youtube.com about program in description put Virus Scan link and direct download link.

You can make fake comments like : Vouch ! Perfect working app ...

In 300 views you will start getting slaves.

Who don't have AV Killer script pm me I will create for you.

Vouch LIST:

Spoiler [\(Click to View\)](#) (Nov 25, 2016 01:48 PM)blackniqqa123 Wrote: [\[CITE\]](#) Vouch for this, really helpfull!

Prefixd - November 25, 2016, 12:45 pm

It is a good tutorial, might be outdated tho (since there are 'better') spreading methods.

Or you could just rename the actual exe to "Exploit.RAR" and make the .bat run the 'rar' so they don't know what ju happend.

Anyways, it's a good share.

BapeZ - November 25, 2016, 12:48 pm

Sounds really nice, could you please pm me with the AV Killer Script?

Best regards

blackniqqa123 - November 25, 2016, 12:48 pm

Vouch for this, really helpful!

Yeah I know this method is old but still doing good ?

djosamyci - November 25, 2016, 6:25 pm

ahahahaah . that"s a real joke

lrrant - November 26, 2016, 2:39 am

Can you PM me the AV Killer Script? Would appreciate!

Codefuser - November 26, 2016, 7:12 am

Wow, funny meme mate. Your shitty .bat AV killer is probably runtime detected and scantime as well soon. I doubt it even kills the AV as you most likely are just using some shitty TerminateProcess crap. AVs are better protected than that.

Yeah me coded AVKiller is detected on runtime right now.

I will try make undetectable and post here ?

purest21 - November 30, 2016, 1:03 pm

the original poster vfagtastic is a scammer! although its little money, but i think you all deserve to know. vfragtasticv charged me \$5 to crypt server for me. as soon as i sent the bitcoin he blocked me from skype instantly. everybody should avoid any sort of deals with him. his skype id is heyfr33k. a real scammer on HF. be warned

kpown - November 30, 2016, 1:08 pm

I used to do similar things when I didn't have a crypter.

I always used to make a rar file with a Readme.txt, some random .dll files with legit names, and a full HQ readme. I also used a free assembly cloner and binder I found online so when they people ran the rat they also got some shitty software too lol

korean - November 30, 2016, 3:31 pm

yo can you help me with an AV Killer script? thx bro :D

CichyCichoCiemny - December 1, 2016, 7:18 am

The .bat file will be detected....

G-Herbo - December 7, 2016, 10:08 pm

Yea I got that to ^ .bat

vfragtasticv - December 9, 2016, 2:20 am

Created very simple av task kill fud !
