What's the point of creating a thread design, it would be much better in plain text.

djosamyci - November 26, 2016, 1:51 am

He's a big scammer. This son of a bitch reads my messages and it does not activate my license for 1 month. On the contrary, he insults me. I think there are many to be fucked like that. This little shit is very dishonest. I have all chat capture with this idiot fool . How that wretch, who feeds his dirty life with our btc. And who refuses to activate a license paid for more than a month. And the worst, it clearly means it, as if it were untouchable on HF. HF must really look at feedback from products on the markets. Be very careful to this seller, you who do not have enough to come to post on HF.

Everything is locked here. Complaints are stuffed in a hidden part of the site. We never got real

feedback from this kind of shit. It's always testimony between friends. I do not claim any more from this bastard of devil to encrypt. But let us inform others before they get fucked

Always to post your filthy false scans. All crypters are FUD, that's it. Yet you do not all, the same price. Gender those who sell expensive, are too stupids ???

Are you retarded? The more expensive a crypter is the longer the FUD time, and the better the USG/the better the features. The runtime results on an expensive crypter is better as well, you can't compare something like a crypter with private stubs with some shitty \$5 lifetime one.

i've buyed this product for review, and yeah, its was good, but then we all know eset will detect an stub by days. my review bring you the true runtime detection rate, look at his threads, ask yourself, why you don't have the product ?

but i stand in side of buyers, not the seller, i just want everything is better for all the users. so if you meet any problem with the devil crypter, contact him directly and solve it yourself, the community will not help you if you're a retard

wew, i just re-analytics about runtime detection and its passed both AVG and Kaspersky with Njrat seem a handsome coder had coded this crypter.

Damn salt. The owner of the crypter is very kind, he gave me a free 45 days license of the crypter for beta testing it, and how can you scan the file when you dont even own the crypter?

breaker1911 - November 26, 2016, 8:15 pm

just some crying kid, cry all over the forum because he don't the toy, we can just ignore that shit and support the good thing on HF

breaker1911 - November 27, 2016, 3:09 am

tons of guy still own that but not you, ask yourself are you good enough to have that crypter no proof, still cryting as fuck

i've active in 30min with Devil Crypter and i have own many more another crypter :) i know what's good.

breaker1911 - November 27, 2016, 8:18 am

that why you get -8 reps, and i'm getting more rep everyday

and who is the stupid is clearly to be seen

you write to long and i don't even bother to read it all. so good luck with thing on HF.

breaker1911 - November 28, 2016, 4:15 pm

and you're the bad dogs of the community, talking like you're the bright lord, show people the way loool

keep crying, that you problem, not mine

i've buy via BTC and everything alright, giving out discount and tons of guy vouch for his crypter, keep trashing the threads don't make his sales become shit because you're the big shit, stop crying and go away.
