Thread: [Uphold.com | Coinbase and PayPal Mashup?](#)

They were previously known as Bitreserve (<https://techcrunch.com/2015/10/14/rebranding-as-uphold-bitreserve-says-goodbye-to-bitcoin/>)

I just came across this site today and went ahead and signed up there. Did not really try any of their services yet.

They seemed to be actually pretty great until I came across some reviews on reddit.
