Thread: [\[Beginner Guide\] How To hack WiFi connection easily!](#)

pinguoin - November 26, 2016, 10:21 pm

Intro;

Since i've been using this trick since 3 years and that i've never seen any guide about this, Here i am doing it ! My main language is french so, im sorry if there's alot of issue about my writing but i'll do my best and try to fix it as much as i can :)

I've not paid any internet since 3 year yet so i hope this can help you :) !

I've tried with KaliLinux but that one program is the best i've found and i'm still using it, they do updated sometime, but u can easily update all the program inside the Linux.

Starting;

So there's some requirement like everything;

Requiered;

Wireless Antenna or simply the "wifi thing from your pc";

A USB key (2-4gb) or CD to boot on, containing the program installed; (I highly recommend the USB key)

Wifislax.iso (You can find it easily on Google from their main Site).

Yes it's mainly Spanish but you can switch it to English once the file booted.

CD Installation;

Just burn the "Wifislax.iso" to a cd :)!

USB Installation;

1. Format a USB key to "Fat32";
2. Once "Wifislax.iso" downloaded, open it with WinRar. (Right-Click, "Open with> WinRar");
3. Extract the whole file to your USB key;
4. Install Wifislax so it can boot on it (Open your USB file "*":\Boot\Wifislax Boot Installer.exe";
5. Follow the spanish instruction (or just try see if it show you the USB letter drive and press on "s" for "Si" then it will complet by itself till it get to "Press anything to complete"
6. Finished (Yes it's already ready to boot !)

Hacking a WiFi !;

1. Close your PC;
2. Start you PC again and press on the "Startup Boot key" (if you don't get it check your bios setting.);
3. Choose the USB dongle that you've configured;
4. Now it's writed in spanish, but you can get it to english, press 2 time on the "down arrow key" then "Enter", or just press on the sentence with the english word :P ;
5. I recomend booting with the first choice of the list;
6. Then this choose is your personal choice, but i recomend "KDE with persistense" but it happen sometime that "XFCE" get less problem;
7. Once fully booted up there's "ALOT" of program that can help you to get throught WPA,WPA2 and WPS key, i recommend you to explore them and learn them, google can help you alot, but i recommend 2 Easy program for beginner with a GUI so you can get your wifi easily :) "GiminisEditor (All-in-One) StartMenu>Wifislax>WPS>GiminisEditor (All-in-One), or PixieScript

StartMenu>Wifislax>WPA2/WPS> PixieScript"

8. Process to the attack and watch it being done :) !

9. Once the WPA Key acquired note it and use it once in windows :) !

I won't be showing you guys how to use the whole thing since it's full of program, there's everything a hacker would need to pentest into a server or something, you can even sell to people needing internet for 30-40\$ the key at their home if you have a laptop (i actually do that :)).

Have Fun!

I really recommend to explore this program to everyone who actually like to use Kali or things like that!

Thanks for ready, Sorry if there's no image and if there's any question just leave it below, i'll be answering as soon as i can :) !

M?xim - November 26, 2016, 10:26 pm

Does this only work with WPA? Cool tutorial.

pinguoin - November 26, 2016, 10:29 pm

(Nov 26, 2016 11:26 PM)M?xim Wrote: [\[CITE\]](#) Does this only work with WPA? Cool tutorial.

it work with everything, i've been doing this with WPA, WPA2, WEP and WPS, if WPS is enable i recommend you to try on this first

Lexxi - November 26, 2016, 10:35 pm

Hope this works, ill look on it soon, seems interesting.

jack1234 - November 27, 2016, 10:44 am

Bookmarking this to read it sometime.

THanks

h4x0rm1k3 - November 27, 2016, 5:59 pm

Wifislax is a great system to use and i've been using it personally for about a year now. Although it's in spanish a lot of it can be worked out easy enough and sometimes even comes with translations. The reason I use it more is because it packs a lot more useful GUI's and tools into it so anything that's vulnerable will fall in minutes and if not then you know you need to use tools like Hashcat to bruteforce the AP.

I would add to your original post though and say that if you use and set up a Virtual machine with say VMware workstation you can save having to make a new partition or whatever and can use Wifislax inside your normal operating system to go cracking which is what I normally do. Another handy feature with VMware workstation is that when you've finished you can suspend the virtual machine so that whenever you need to use it again you'll load straight back up to where you left off!

dxgamehhh - November 28, 2016, 12:48 am

thanks for sharing , i'll try it hope it work

mftzy - November 28, 2016, 4:06 am

Its work for all OS? Thanks for share

pinguoin - November 28, 2016, 5:15 am

(Nov 28, 2016 05:06 AM)mftzy Wrote: [\[CITE\]](#) Its work for all OS? Thanks for share

Nope sorry it's actually a Linux Bootable iso :) sorry

Ellakid - November 30, 2016, 10:09 am

Bookmarking this, might learn alot from it.

SIM-2985009 - November 30, 2016, 10:22 am

Bookmarking this, might come handy sometime in the future! Thanks for the share!

kcommenter - December 1, 2016, 11:49 am

Bookmarked for future , will try soon .

Can we use this on Rasperry PI too ?

pinguoin - December 1, 2016, 8:12 pm

(Dec 1, 2016 12:49 PM)kcommenter Wrote: [\[CITE\]](#) Bookmarked for future , will try soon .

i think it might be possible, u can search on google about this theres some portable versions of it like kali but i've only experienced the PC version

xoros22 - December 2, 2016, 1:46 pm

Hi , I know u will laugh but I just cant fucking find a resolution :P

I am a little bit familiar with wifislax but I dont know some linux base commands

So When I log off wifislax and when i boot it again all my files I created and downloaded are removed, I search a little but mostly tutorials are for kali, (I know that both are linux)

So please can u tell me because u will help me a lot because is very anoying losing all your data that you downloaded or created, Btw GREAT TUTORIAL :)

Jagster™ - December 3, 2016, 6:03 am

hmm what exactly does it do? My current method for Wifi cracking is Fluxion its extremely simple and I have a high success rate

kcommenter - December 3, 2016, 6:10 am

(Dec 3, 2016 07:03 AM)Jagster™ Wrote: [\[CITE\]](#) hmm what exactly does it do? My current method for Wifi cracking is Fluxion its extremely simple and I have a high success rate

Mind sharing it with details ?

Stupid Fool - December 3, 2016, 8:02 am

Thank-you for this guide I am beginner and it was interesting to load this up and see all the tools. But extra confusing because most have no English ?

Jagster™ - December 3, 2016, 3:44 pm

(Dec 3, 2016 07:10 AM)kcommenter Wrote: [\[CITE\]](#) Mind sharing it with details ?

It is a script I run in Kali Linux, you can find it [here](#)

also: <https://hackforums.net/showthread.php?tid=5200841>

yourmommy - December 7, 2016, 5:13 am

i have a few years ago installed this on my laptop hdd, if you install EASYBCD you can easily set this up with you other os installation.

so if i now start laptop i can choose: windows 10,7,xp,kali,wifislax

no more thumb drives or DVD/CD

I want so badly install pixiescript v2.6.3 on kali. But i can not do it :S
or wifislax on my pi would be nice! But that can not.

The Kraken - December 7, 2016, 5:28 am

replying to check out later,
thanks for the tutorial!

SIM-2998667 - December 7, 2016, 5:37 am

Great guide, replying to come read it again later

Numinous - December 7, 2016, 5:38 am

I don't think so it would works with ALPHA Router/Modems ?

agjensia - December 7, 2016, 8:09 am

Lets learn this guide for WIFI WPA CRACK

pinguoin - January 1, 2017, 3:30 am

(Dec 7, 2016 06:38 AM)MoneyMakerOnWeb Wrote: [\[CITE\]](#) I don't think so it would works with ALPHA Router/Modems ?

Not sure i can't answer to this sorry :\

requiemid - January 1, 2017, 11:51 pm

bookmarked. trying to learn it :)

Diobolic - January 3, 2017, 9:30 pm

Looks interesting indeed. I've never heard of this more so I'll definitely check it out when I have the chance! :)

TechRonn - January 5, 2017, 8:38 am

Bro I'll gonna be practicing this instructions you'de post. I hope ill do it ryt :) Sound so interesting .

p4r14hd0g - January 6, 2017, 12:56 pm

I bookmarked and will learn later! Thanks to you :)

darkpig12 - January 8, 2017, 10:05 am

Can somebody help me, when I try and click "Windows_Wifislax_Boot_Installer" it just tells me that this app cannot run on my PC; any help would be appreciated :)

InvictusLatinus - January 8, 2017, 10:46 am

darkpig12,

Try burning the ISO using Rufus.

rufus.akeo.ie/downloads/rufus-2.11.exe

darkpig12 - January 8, 2017, 11:15 am

(Jan 8, 2017 11:05 AM)darkpig12 Wrote: [\[CITE\]](#) Can somebody help me, when I try and click "Windows_Wifislax_Boot_Installer" it just tells me that this app cannot run on my PC; any help would be appreciated :)

Don't worry, it was an issue with how large the usb drive was, sorted now.

Can anyone help?, When I load up the "Windows_Wifislax_Boot_Installer" and do 's' to continue, I get some stuff in Spanish and the message "The system cannot find the path specified".

Am I doing anything wrong?

warface9991 - January 10, 2017, 2:40 am

It stuck in black screen when i click the ' wifislax64 live uefi(espanol)

jurij009 - January 25, 2017, 10:24 am

very nice tutorials...i'll save this for future use...

BlackKnight11 - January 25, 2017, 10:48 pm

Awesome... cool tutorial:)

anonymous120 - January 26, 2017, 2:36 pm

Thanks alot for sharing this method :)

Strange that this havent been out here before.

Alex Fisher - January 26, 2017, 5:50 pm

Any Wireless Antenna you recomend for this? If my laptop has it built in, do I still need one for signal strength etc.?

FractumSeraph - January 26, 2017, 6:01 pm

(Jan 26, 2017 06:50 PM)AlyxFisher Wrote: [\[CITE\]](#) Any Wireless Antenna you recomend for this? If my laptop has it built in, do I still need one for signal strength etc.?

You need to make sure your built in card supports monitor mode. Not all of them do. If your's does, then no you don't need one. However, you could use one if you wanted more range. I always recommend the [Alfa AWUS036NEH](#). (\$25) With an optional [9dBi antenna](#). (\$10)

The 9dBi antenna is quite large, so it's entirely optional. You'll still get better range with the included one.

If you're not sure if your device supports monitor mode, the easiest way to check is just by trying it. Boot into kali and try to sniff packets with airodump.

Code airmon-ng check kill

airmon-ng start wlan0

airodump wlan0

quirky - January 27, 2017, 4:40 am

Code airmon-ng check kill

airmon-ng start wlan0

airodump wlan0

actually he needs to check with "aireplay-ng -9 wlanX"

without injection, monitor mode is quite useless

Am I doing anything wrong?

Check if you're not trying to use the "Windows_Wifislax_Boot_Installer" From a different Drive, make sure you've extracted the whole .iso to the USB pen and loaded up from the USB pen and not

from the .iso folder or your desktop, and make sure to has download the right Wifislax version

mutantroach - August 9, 2017, 2:24 am

Hi! I have some questions. Does this have any mac or pc specification or is it the same for both and does it still work in August 2017?

Also I was on youtube and I found nothing helpful on the topic of hacking wifi's! The closest I came to was this tutorial and I just wanted to know if it is okay to try it or is there a catch to it? Bc on trying it out I found out that it does work the first time but the next time around you get a restricted access warning. I cannot post its link because I get the message that I cannot post links until I have made 50 posts so I'm just gonna mention the tutorial by name:

Tech Help: How to hack wifi password in Mac

Also my question about hacking wifi is not how to hack a wifi exactly! I want to know how to get discreet access to a wifi that has blocked you. Clarifying! I am not asking how to access blocked websites on a wifi that I DO HAVE ACCESS TO but how to access a wifi that has blocked me. But discreetly so that I don't show up on the list of devices connected to the network!

maxbrandy - August 10, 2017, 4:56 am

can you guys make a video for this

masterpill - August 10, 2017, 5:18 am

Is this a brute-force method?

Nice tut by the way.

pinguoin - December 3, 2017, 7:37 pm

(Aug 10, 2017 05:18 AM)masterpill Wrote: [\[CITE\]](#) Is this a brute-force method?

Nice tut by the way.

There's everything you need on it, if you have you're own dictionary it is awesome if not, there's some that can try to generate for you but it takes alot of time till it get the password...

GrandpaSherman - December 4, 2017, 1:49 am

I dont see Geminiseditor or whatever the firstprogram you mentioned

Misbehave - December 8, 2017, 5:49 am

This is cool, thank you for sharing.

xADHDx - December 8, 2017, 5:53 am

Great tutorial, I bookmarked this also!

TECNILUIS - December 8, 2017, 11:00 am

Nice tutorial! Just bookmarked it. I will definitely try it out with my laptop.

Is it going to work faster if I use a better PC or antenna?

pinguoin - December 9, 2017, 1:00 am

(Dec 8, 2017 12:00 PM)TECNILUIS Wrote: [\[CITE\]](#) Nice tutorial! Just bookmarked it. I will definitely try it out with my laptop.

Is it going to work faster if I use a better PC or antenna?

Yes, best quality will be your antenna, faster it will be to get through the process, i recommend to put you antenna in the middle of the room or in the window if, those are the 2 best spot, actualy, someone told me that he had a network 2 street away but he has to put his antenna in a specific spot in the window to get it then he repeat the signal with a router

pinguoin - February 22, 2024, 4:46 pm
been a old post but still workin !!

Dotequal - February 25, 2024, 11:51 pm

proably still workin and now being use as a common tool QQ

Qasim121 - November 26, 2024, 3:28 pm
Does it still work in 2024?

eIFhack - December 6, 2024, 5:38 pm
Is useful in the 2024?

Rsynced - January 7, 2025, 12:06 am
IT WORKS 2024 YES IT DOES

PastaHacker - January 23, 2025, 10:59 pm
I am testing this tool on VirtualBox. Can I use my host machine's Wi-Fi on the virtual machine without an external network adapter? If so, please guide me. This post is also very helpful.

kareem123 - March 3, 2025, 6:40 am
Thank you. this is useful

Thul3a - March 4, 2025, 2:08 am
How is this different from aircrack?

Ange75 - March 19, 2025, 7:38 pm
Thank you, I'll try and see how it goes.

xtscy - March 21, 2025, 3:58 am
thanks for sharing , i'll try it hope it work

core_14532 - April 30, 2025, 3:43 am
Thanks for the share!

Xeratu - May 11, 2025, 12:31 am
It's 2025 does it still work just curious?

eliobn - May 29, 2025, 10:16 am
bookmark and save for later thx

tripp88 - June 2, 2025, 5:28 pm
thank you i will try it with a virtual machine

cool!?? thats what i need
