Thread: [How to do the snow fall effect!](#)

Torc - November 27, 2016, 2:51 pm

Since I had a couple of people messaging me about it, thought I'd make a video. :)

[Video: <https://www.youtube.com/watch?v=xebLrXbHZGg&feature=youtu.be>]

or you could just google "snow stock" and use an image like [this](#) and drag it into PS and change the mode to "screen". ?

That works too, but my tutorial shows how to do it lol. You're just listing a snow stock instead of making your own.

+Cloud - November 29, 2016, 8:59 pm

its ez. just move the snow then tween it

ama - November 29, 2016, 9:01 pm

Nice tutorial man, helps out newcomers like me.

Just did the santa hat also.

Intel - November 29, 2016, 9:02 pm

How fast did you speed up your voice lol

Not complaining, it's a really HQ tutorial and is appreciated.

Not at all. I just talk fast to make the video shorter. I hate watching tutorials where people explain something for a minute when they could have just said what needed to be done in 10 seconds.

That's impressive man.

Also I have a suggestion to make the snow look more real:

What if you have 2 layers of snow, and then you animated the layers going in opposite diagonal-down directions. It could give a more 3-D effect.

shits legit thats what happens

Squidward - November 29, 2016, 9:18 pm

torc <3 you know what i would love? for you to do this to my avatar.

Please correct the following errors before continuing:

The size of the uploaded file is too large.

HackersKing - December 28, 2016, 11:23 am

i think this is really nice work good job.

Tequinox - December 29, 2016, 10:49 am

Hum Youtube video is down ^^

-Rampage- - December 29, 2016, 10:50 am

Orrrrr you could go to lunapic and use the snowfall animation.
