Just finished this show for the 4th time. Was wondering does anyone have information if they are going to make a new season? I've seen that the light novel is getting more funding and work... So does that hint that so will the anime?

No news on the anime, but if you don't mind reading, you should pick up the light novels. They're nice af. On Volume 18 now (almost done translations).

Also, if I were you, you should re-read from the beginning, they're a lot the skipped even though the anime was still pretty good.
