Thread: [List of Websites to Buy/Sell Bitcoin with Cash, Credit, Debit, or Bank Account](#)

Kill Joy - November 27, 2016, 9:04 pm

I am a little tired of seeing a new thread every day asking the same question. Here is a list of trusted websites to buy and sell Bitcoin with debit and credit cards, or with a bank account. Please note that you will more than likely be required to provide photo verification with most of these websites.

Buying Bitcoin Instantly With A Debit Card

[Coinbase.com](#) - [Click me for a full list of payment and payout options for US, CA, UK, EU, AU, Sing.](#)

* Coinbase has limits on the amount you may buy and sell bitcoin. View those limits [here](#).

[Bitpanda.com](#) - [Click me for a full list of payment and payout options.](#)

* View BitPanda's limits [here](#).

[Libertyx.com](#) - Buy with cash at participating retailers and stores. Seems to be U.S. only. [Click me for a participating locations and guide on how to buy with Libertyx.](#)

<https://cex.io> - Buy with Debit, Credit, or Bank (USD, EUR, RUB). [Click me for a list of restricted countries.](#)

* View Cex.io's limits [here](#).

[Coinmama.com](#) - Buy with Credit, Debit, and Western Union. Accepts most countries worldwide.

[QuickBT.com](#) - Buy with Debit, and cash. CANADIANS ONLY. QuickBT can only process \$150 per day per confirmed Canadian cell phone number.

List of websites that accepts a wide variety of payment methods

<https://localbitcoins.com/>

<https://www.kraken.com/>

<https://bitonic.nl/>

<https://www.zebpay.com/> (India)

<https://paxful.com/>

<https://btc-e.com/>

<https://www.coinjar.com/> (Australia)

<https://www.bitquick.co/>

Additionally you can use the [Currency Exchange](#) on Hack Forums. It is advised you deal with caution as you are dealing user-to-user and run the risk of being scammed.

It is recommend you use a trust Middleman, which one can be found [here](#). If you wish to know who I use for currency exchange on HF, don't hesitate to send me a [private message](#).

If you have any opinions or any other websites you wish to be added to the list, feel free to voice them below and I will review it and possibly add it to the list.

Thanks for the update OP.

I was wondering your thoughts on coinbase? I have seen a few comments around from HF members saying they don't like it. Is this for any particular reason like charges, functionality or any other reason? I have used it for a while and had no real problems with it.

Nyxuo - December 7, 2016, 7:01 am

You might want to add QuickBT for Canadians and you may also want to remove Circle as apparently they no longer do exchanging or they may be shut down all together. Good post OP some good information.

How does one get his limit raised from \$50 on coinbase or is any of these sites have a way higher limit that I could get? I'm like a scavenger now that circle has abandoned me.

Verifying all the information you can and adding security will help raise your limits. Other than that, purchasing x amount of bitcoin can also raise your limit.

You can increase your debit card limit by providing ID, address etc...

I believe the limit is also a lot higher if you do a bank transfer (takes 5 days with a small bank charge)

Sure. Or convert bitcoin into Monero and use Monero to pay. It's very secure and private.

If you use Coinbase, the IRS will want a cut of your gains if the Bitcoin price goes up. Probably every other major Bitcoin seller will follow this route. It's best to deal with people locally through LocalBitcoins, pay in cash. Meet in a bank or library for your safety.
