Some of you may remember this website from before, but now it is not just reviews and more of just a blog - with the same management though. We have relaunched it with new content and a new style and am really happy with it again :)

Add margin-top: 15px; to the body, looks weird being at the top.

Also, have a look at

<https://chrome.google.com/webstore/detail/google-font-previewer-for-engndlnldodigdjamndkplafgmkkencc>, some of the fonts don't match.

Otherwise, looks good. Nice job.
