Thread: [\[FREE\] Infinity Turbo & Checker - Instagram and Twitter | 2016 | BETA](#)

Decim - November 29, 2016, 12:46 am

Infinity is a project that I started working on after releasing my first Instagram turbo. Apart from being a helluva lot faster than its predecessor, it has a whole array of additional features, including support for Twitter.

Just like the other turbo, this does not make use of the official Instagram/Twitter API so the chances of the application/your account getting banned are slim.

Features: Multi-threaded username checker for Twitter and Instagram.

Ban filter - Unlike most checkers, Infinity has the ability to filter out banned usernames and does not show them as available.

Blazing fast turbo - This is literally faster than or as fast as all the turbos currently available.

Animated Preview:

Here's a quick preview of the checker just to show its speed.

I might post a video of the turbo sometime in the future but for now, just check it out yourself.

This was the beta version of the program released to test for bugs and possible issues.
It was sent to everyone who had messaged me.

Thanks for the feedback, closing this for now.
