Thread: [\\$865 profit playing Black Jack in 2 days \[UPDATED\]](#)

The Illusionist - November 29, 2016, 6:23 am

Current balance:
\$1100

I started with \$500 2 days ago, all of this money has been made playing Black Jack. This brings up my total Black Jack earnings to around \$1000 :)

Edit:

I just went to the physical casino and tried my luck there. In the end, I won an extra 250 EUR (\$265)

So in the end I made \$865 in 2 days!

I see you are sneaky trying to get the new gambling award don't you haha.

Nice earnings though, keep it up and don't lose it.

I was on about the same when I carried on playing. No matter how high the count I kept losing.. Put me off. Was doing red 7s.

Nice one OP. Blackjack is hit and miss, easy to win and even easier to lose.

Just paid a visit to the casino and made another \$265 profit playing Black Jack, today was a good day.

Do you play poker as well? I prefer that over black jack. What site do you use by the way

Dope! I need to learn to play this shit. I know how to play Blackjack a little bit, but I'm not very good.

Only played it a few times on my phone and such.

You just gotta learn the basic strategy of when to hit/stand/double/split and then have a good betting strategy behind it.
