Just a heads up, Monetizing(live:fundingtotravel) was caught leaking/using other people picks on another forum.

Picture of his advertisement on another forum :

Got called out using other people's pick :

Claims it was his tipster :

Thread was closed :

No idea if this is considered an scam/fraud but it seems like OP is basically just copy + pasting other people picks.

EDIT : OP PMed me to make this post "neutral", I am simply just sharing what I have seen in the other forums.

Thanks for bumping :)

I don't deny the fact I'm buying tips from other to post in my group.

In fact I'm sure you don't know shit about betting world, there's 99% touts finding the right picks isn't that easy at all and it's costly and time consuming.

We use extensive knowledge in different betting, staking, bankroll management strategies to archive positive outcome in long run, which group dare to show their full record ? ?

FYI, We already stop using their picks when we found the tipster I paying well is basically giving me \$30 shit.

Also just let you know I'm spending almost \$600~1000 per month just to buy quality tips, the reason of running a betting group is just for me to lower the cost of them through sharing the cost of the tips, the group doesn't even cover half to the cost.

NOW DON'T TAKE MY WORDS, GO BUY THOSE \$30 TIPS YOURSELF, AND SEE IF YOU CAN ACHIEVE THE SAME.

Check out my betting records and recent bets.
