Thread: [\[Android 7.1\] Silent Download & Execute Java Exploit \(Update 111\)](#).

NSA - November 30, 2016, 7:52 am

[Android 7.1] Silent Download & Execute Java Exploit (Update 111).

With this exploit that works with java and any android device, will automatically download and execute when visiting said DNS that is setup with the vuln.

This works with current Android and current Java. Serious buyers only, only accepting BTC.

J?son - November 30, 2016, 8:36 am

Vouch for this, seen it working

Dr.Octopus - November 30, 2016, 8:40 am

Can i see a demo if you dont mind?

focks - November 30, 2016, 9:03 am

demo please i might interested

thecoona411 - December 1, 2016, 4:45 am

OpenJDK on Nougat, as far as I know there has been nothing spotted in the wild and the roll out target platform after launch in August after being built up since 2015 makes this is a very valuable exploit. None of the big name brokers can quote a price, so they don't have it.

If you can explain the exploit sell it to the top brokers. If any one had so far it would have been published. If it is real post a PoC showing it in action.

GLWS.

Agree with you , just wondering cause Nougat was rolled out in the month of October and is the latest version of android till date. So is it possible to exploit it ?
Anyways Demo is appreciated and GLWS ?

BlackPanth3R - April 8, 2017, 2:48 am

Posting to come back later when OP shows us the demo

tty666 - April 10, 2017, 1:37 am

Very interested but indeed a demo is necessary here dude :)

Mr. Robot - April 10, 2017, 1:39 am

If you are able to give a demo of this I would be happy to do a review and vouch on behalf of this exploit.

Best of luck with sales as this could be a really interesting tool to add to my arsenal.

mushroom88 - July 10, 2017, 11:05 pm

interested, possible to pm me?

I-GANK-I - July 11, 2017, 7:20 am

this probably costs like \$5000

i doubt anyone here has the money, however i do wish u luck with sales :)

NSA - January 7, 2018, 10:06 pm

Still for sale, has been updated and still works with updated releases.

NSA - February 2, 2018, 11:45 pm

I've finally decided to let this go, I'm only accepting BTC.

It's still working very very well. Please send me a DM on Twitter @Fogles for quickest response.

NSA - March 7, 2018, 11:23 pm

Still for sale, still working. Contact me at Twitter
@fogles

HeXaGoN Dev - March 7, 2018, 11:28 pm

[Android 7.1] Silent Download & Execute Java Exploit (Update 111).

Downloads what ? Execute Java Exploit ?

Can you elaborate it please?

brianfs - March 7, 2018, 11:41 pm

Can you tell us if somebody have a vouch for that?

Because i see a lot of people which are asking about the demo and I cannot see any review about that and you have not reply to all questions..

Please let us to see it in action with one video or something to proof you have it!

In the last time many people are claim to have something but they are only a scammers!

Lextian - March 7, 2018, 11:42 pm

Can you elaborate more on this am interested

NSA - March 8, 2018, 12:43 am

I can get vouches but keep in mind I don't give vouch copies to just anyone.

this basically is a latest Android exploit that uses Java, victim visits infected site, automatically downloads backdoor, and silent executes, undetected.

ARIANA - March 8, 2018, 5:24 am

Note that 7.1 is run by basically all android boxes at this point so the target range is massive.

NSA - March 9, 2018, 5:22 am

this is a really expensive exploit 5-7k. hard to sell it because of price, if anyone is really interested I'll

let it go for 800-1k today only

NSA - *March 13, 2018, 2:46 pm*

Still available. DM me or hit me up on twitter @fogles.
