Thread: [\[Release\] TP UAC Bypass v1.1 | UAC Exploit |](#)

Tee Plow - November 30, 2016, 4:09 pm

Hello Everyone

today i release this tool coded in vb.net , it will make any run as administrator without showing uac dialog box, it has also an icon changer

Works on Windows 7, 8, 8.1, 10 32/64 Bits

Screenshot :

Download :

<https://mega.nz/#!khwgRR4J!sM9c7B5KIL484PYr-wP00A76Z2K4CHPhXoJ5k79S5Yc>

pass : Teeplow

Note : If your File size is more then 100kb Use Downloader

Forc?d - November 30, 2016, 4:13 pm

Looks good, does it drop files or loads into mem -> Runpe ?

Tee Plow - November 30, 2016, 4:19 pm

[quote='Forc?d' pid='53287766' dateline='1480551189']

it's not a downloader , it will just download your file and run it as admin
if i run it in memory or runpe the bypass won't work

SIM-2053312 - November 30, 2016, 4:34 pm

This is a public UAC bypass method?

QU?CKSILVER - November 30, 2016, 4:41 pm

Ofcourse it is, lol.

Hi8snow - November 30, 2016, 5:38 pm

Thanks this man, will try use, thanks!

pogamo014 - November 30, 2016, 6:06 pm

sweet man i will check this out!!!

yotoprules - November 30, 2016, 11:44 pm

Hey, could you add startup to this? Looks like a great tool :)

Codefuser - November 30, 2016, 11:49 pm

Thanks, what method are you using? Dll Hijacking? Eventvwr? Disc Cleanup?

Tee Plow - December 1, 2016, 12:50 am

Rottapotta - December 1, 2016, 6:15 am

This is a public copypaste. Dont expect anything special from this. It uses eventvwr

Codefuser - December 1, 2016, 7:12 am

So? It is free. He made a GUI for it. Stop shitting on free releases.

ErudiN - December 1, 2016, 9:34 am

Release your Android RAT pls... :(

Rottapotta - December 1, 2016, 10:38 am

Just informing people about this.

Slavoj Žižek - December 1, 2016, 10:44 am

I was informed Eventvwr method has been patched in the latest updates.

great release though!

purest21 - December 3, 2016, 3:24 am

is this a crypter? or we should use this after crypting to bypass uac?

dewoo - December 3, 2016, 3:35 am

Good job dude. thank you very much

yotoprules - December 3, 2016, 4:02 am

(Dec 3, 2016 04:24 AM)purest21 Wrote: [\[CITE\]](#) is this a crypter? or we should use this after crypting to bypass uac?
after crypting

purest21 - December 4, 2016, 12:32 pm

(Dec 3, 2016 05:02 AM)yotoprules Wrote: [\[CITE\]](#) after crypting
it worked. thanks mahn

Purple Kief - December 4, 2016, 2:52 pm

Honestly a nice post but it doesn't belong here.

purest21 - December 5, 2016, 7:45 am

please does this work om every wondows OS. does it work in 8, 8.1 and and 10?

QU?CKSILVER - December 5, 2016, 8:53 am

The UAC evasion technique works from Windows 7 to Windows 10 32/64, but this little tool will output an executable that depends on the .NET framework 2.0, which reduces the execution rate on Windows 8/8.1/10 significantly, since those don't have this particular framework pre-installed.

purest21 - December 5, 2016, 10:17 am

so you mean this tool's output only works with .NET Framework 2.0? what of above 2.0 because most common is 4.0 and some have updated to 4.6.2

so windows 8 and 10 dont have up to 2.0 framework? can you clear me please ?

QU?CKSILVER - December 5, 2016, 6:58 pm

The executables built by this tool will depend on the .NET framework. Windows 8, 8.1 and 10 come with .NET 4.0+ pre-installed, but the problem is, it's not directly backwards compatible with older framework versions such as 3.5 and 2.0, meaning that the executable will NOT run unless target machine has either .NET 2.0 or 3.5 installed.

I'd recommend using native (non-dependent) RATs + Crypters + UAC bypass builders.
