Thread: [Interactive C/C++ tutorial?](#)

Caleb™ - December 1, 2016, 5:18 am

Are there any websites which have interactive C/C++ tutorials like codeacademy forexample?

Cha0 - December 1, 2016, 5:21 am

<http://www.learn-c.org/>

<http://www.learncpp.com/>

Google dude...

Good luck.

g4143 - December 1, 2016, 5:42 am

C++ is about reading large language technical books. You can go any site and run through tutorials and exercises but to 'really' learn C++... To really learn C++ involves reading 10's of thousands of pages of C++ books.

Read these books in this order.

1. Introductory book - Teach Yourself C++ in 21 days by Jesse Liberty or Accelerated C++ by Andrew Koenig
2. Something to re-enforce the basics plus introduce you the the C++ standard library - C++ Primer by Lipman, Lajoie, Moo
3. A formal introduction to the C++ standard library - The C++ Standard Library - A Tutorial and Reference by Josuttis
4. A book on makefiles, compilers, linkers, binutils, debuggers.

If you manage to get here - congratulations - you are squarely in the C++ beginner to intermediate range.

Now you need to get a formal book(s) on templates and one on the C++ IO system and one on C++'s object model and have a look at the Boost site and so on and on and on.

Learning C++ is not a short or simple journey.

Try dropping Goodies or 0xDEAD10CC a PM to get an alternative (but probably longer) list of C++ books.
