Hi everyone! Just thought I would show you what I decided to treat myself with today?

As some of you may know I currently run a fairly successful AGC/Gift Card Sale Thread right [HERE!](#)

Anyways I decided today was the day I would spend some of my earnings:)

Haha Thanks. I know, I was just looking for something decent since I don't know very much about headphones.

People can shit on me all they want.

I know Beats are bad for their price. But I really do like the brand Bluedio. They live up to their name and they have IMO some really great headphones including their UFO+ headphones which have 6 speakers in each cuff.

For real... You could have just done a quick Google search and found so many better brands...

Why do people buy Beats honestly? I'm just trying to justify \$200+ on headphones that are mediocre at best. Of course they'll get the job done for you but did you ever consider other brands / suggestions? It's good to treat yourself nonetheless and if you're happy with the purchase, that's all that matters.
