Thread: [scammed by Thermal the Prophet uid 2951661](#)

chukyxmi113r - December 1, 2016, 6:44 pm

I conacted Thermal the (fake) prophet to purchase the metro http botnet, he said he had a better botnet omeganet, which he coded by himself and advised me to buy omeganet.

He said full package was \$100 and comes with 3months hosting or builder and also support e.t.c

i asked him to show me a demo of botnet working on his pc before i can pay. He tried setting it up on his pc (so he said) but couldn't, and assured me it will work on my server. We agreed i pay \$24 to get the botnet and he builds a stub for me. if botnet works fine i can then complete the remaining \$76.

i made payment and bought a bulletproof server where i hosted the botnet with his intructions.

I did everything he asked me to do, yet botnet doesnt still work. Now he says he doesnt give support and ignored when i asked for refund.

After i run stub i see no process with the supposed name on task manger, also i asked him to tell me folder where the stub goes to when i run it, which he has not told me.

Now i have offered to pay for support if he can show me a demo of botnet working on his pc.

Thats not much to ask.

Edit: WOW! he just blocked me on skype after he had exhausted all his excuses. lol. Typically scammer!!!

Instead of showing me demo. i even accepted to give him \$10 for setup if he can show me his botnet working on his pc.

Please beware of this cheap fool.

lol....so you have less than half a brain since you couldnt set it up for yourself on your pc.

Still waiting for you to set it up and show me demo on you pc. tbh i doubt you coded it. Also tell me which folder stub goes to when run and the process name.

(Dec 1, 2016 09:18 PM)FunctionDev Wrote: [\[CITE\]](#) Give me the panel and i'll set it up and see if its legitimate or not.

caiveman - December 2, 2016, 3:02 am

Thermal can't code, just like 90% of the people selling "botnets" on hf.

Lauren Southern - December 2, 2016, 3:07 am

(Dec 1, 2016 09:09 PM)The GRim Wrote: [\[CITE\]](#) Another scammer from Illuminati.

I wish they wouldn't ruin such a cool group name like that. ?

This is what happens when you allow anyone to buy-in for \$10

Motusora - December 2, 2016, 3:16 am

i hope this will be resolved soon .

Koopa. - December 2, 2016, 4:20 am

"It's 100% coded by me"

You should have abandoned the deal as soon as he said that.

Therm?! - December 2, 2016, 7:51 am

As I've said before, anyone can try this if they'd like, fuck it, probably just gonna make this free.
Retards like op have 0 expirience in setting up nets and expect someone to hold their hand through the process.

Codefuser - December 2, 2016, 7:56 am

You got scammed. OmegaNET and Metro HTTP are both bought from a closed member and is sketchy as hell. OmegaNET is LiteHTTP rethemed as well, look his sales thread.

Koopa. - December 2, 2016, 8:04 am

(Dec 2, 2016 08:51 AM)Thermal the Prophet Wrote: [\[CITE\]](#) As I've said before, anyone can try this if they'd like, fuck it, probably just gonna make this free. Retards like op have 0 expirience in setting up nets and expect someone to hold their hand through the process.

But you don't know how to setup your own net?

You set the net up you fucking idiot, you more than likely failed to build the stub properly or failed to set up the db. Anyways, not my issue

FunctionDev - December 2, 2016, 2:00 pm

(Dec 2, 2016 02:28 PM)Thermal the Prophet Wrote: [\[CITE\]](#) You set the net up you fucking idiot, you more than likely failed to build the stub properly or failed to set up the db. Anyways, not my issue

It is your problem. You were the seller who sold it to him. Lets keep in mind here that he was buying "YOUR" botnet and not the one he originally wanted to buy. He clearly didn't know how to set that one up and that is your fault for not teaching him when he has NO idea what he's doing with a botnet you dropped on him at the last second. Keep in mind, he didn't have to buy YOUR botnet as he was keen on buying the one you originally were selling. Since you gave him a completely different one, he deserves a free setup or a simple tutorial teaching him how to set it up.

Koopa. - December 2, 2016, 2:15 pm

It is his fault for misleading the customer into purchasing a "100% coded by me" botnet.

Thermal told OP that his setup fee was 10 dollars. Now whether that was the net "HE" coded or the one he was originally trying to sell I don't know. And i'm pretty sure if thermal coded his own fuckin net he'd know how to set it up. The guys a scammer.

You sold OP something completely different from what you were originally selling, which completely changed the whole deal. Obviously he wouldn't know how to set it up because it was supposedly "coded by you" so its not his fault. Remember this, he didn't have to buy YOURS. You dropped it on him at the last second and made it seem way better than the one he was originally buying.

Aww, what a child. Neutrals me and calls me a retard even though I'm right. Come on man, just help the guy so he can close this dispute or keep acting like the scammer you truly are.

Therm?! - December 2, 2016, 3:29 pm

(Dec 2, 2016 05:07 PM)STE?? Wrote: [\[CITE\]](#) Oh yes you did

yes, never part of the deal, that was me being a kind person, but other things came up. He never paid me for set up

minimalist - December 2, 2016, 4:37 pm

What can you expect? He probably doesn't even know how it works himself.

Tommy Chong - December 2, 2016, 5:42 pm

(Dec 2, 2016 05:35 PM)Thermal the Prophet Wrote: [\[CITE\]](#) yes, never part of the deal, that was me being a kind person, but other things came up. He never paid me for set up

Even though it wasn't part of the actual deal, you said you would set it up when you got the cpanel details.

Doesn't matter if he payed for a setup or not, you said you'd do it.

But you don't even know how to do it yourself, that's obvious.

You claimed that you didn't have XAMPP installed at first.

But in the skype logs you couldnt get it to work on your localhost, wich indicates that you did have XAMPP installed or atleast something similar, OR it indicates that you're completely retarded not knowing you can't run php without a webserver running locally.

SZociety - December 6, 2016, 4:21 pm

(Dec 2, 2016 05:35 PM)Thermal the Prophet Wrote: [\[CITE\]](#) yes, never part of the deal, that was me being a kind person, but other things came up. He never paid me for set up

You can't even show proof of it actually working. Stop destroying the name of a good group due to your ego and incompetence.
