Thread: [\[GAME BREAKING GARRY'S MOD 13 EXPLOIT\] RELEASED](#)

smartmember - December 1, 2016, 10:13 pm

[align=center]This is the biggest exploit ever found on garry's mod.

Programmed in C this exploit takes advantage of networking in the source engine.

This exploit will WORK on any garrys mod 13 server

Once executed the dll on garry's mod, you can send any serverside commands to the server you want.

This is extremely new, so use it while you can it will likely be patched in 1-3 days

Without a doubt the biggest exploit ever released

Feel free to do a virus scan

wikisend.com/download/661998/sourceengine_serverside.dll

(Once executed on your client you will see a message in garrys mod chat)

[garryside] ENABLED

you can then execute any lua serverside command in console using

garrysside (lua here)

playet - December 1, 2016, 10:38 pm

Probably fake. Reported this

smartmember - December 1, 2016, 10:40 pm

>fake

you're a downy

stick to public bots retard, do a virus scan.

sad how you skids are so foreign to this

playet - December 2, 2016, 5:05 am

Public bots. Huh you are funny. Virus scans don't prove anything. With a crypter I can make everything Fud.

Stashy - December 2, 2016, 5:06 am

who even plays garry's mod anymore lol

smartmember - December 2, 2016, 5:10 am

@hubba

r u stoopid
