As we can see from the feature list, both are the exact same botnet. I also have a friend who reached out to the original Omega Net coder (<https://hackforums.net/showthread.php?tid=5215529&highlight=omeganet>) and he confirmed that Metro HTTP is OmegaNET:

Spoiler ([Click to View](#))

We can now conclude that OmegaNET = MetroHTTP

Now let's take a look at the last page of the OmegaNET thread:

User also have a history of selling LQ products:

Aurous Protector was found to be only scantime, as can be confirmed by multiple members (Such as Fade, DeluxeSoftware, Jelokadi, etc)

DWC at all cost.

Edit: People are claiming that I decompiled this. I did not, I am getting the evidences from the last page of the OmegaNET thread.

Not defending him, but thermal bought resale rights to MetroHTTP from Metro.

Shanonnn - December 2, 2016, 10:26 am

well, i was actually looking into this aswell and i can confirm that there are some things 100% identical between litehttp and the net Thermal was selling...

Metro most likely didn't know it was rethemed litehttp since he bought it from OmegaNET's coder. Thermal knows that it is because he knows omeganet == metro http. And he knows that OmegaNet == LiteHTTP (as we can see on the last page of the omeganet thread). Therefore he can't defend himself like this.

Came to say pretty much this, it's against the site DREDD rules to decompile user software... Just sayin' OP, kudos on the find. But might bite you in the arse lol.

FunctionDev - December 2, 2016, 8:13 pm

So you made someone buy it for 100 FUCKING DOLLARS IN THE LAST SCAM REPORT MADE ON YOU? YOU'RE FUCKING SICK KID.

It's not cracking but he did decompile his bot. Either way he is breaking the rule even if it's the same product.

Codefuser - December 3, 2016, 3:20 am

I did not decompile this. DeluxeSoftware did with thermal's permission as we can see in the last post of the OmegaNET thread.
