Thread: [Small Awards Glitch](#)

Cryptic™ - December 3, 2016, 11:57 am

This has been going on for like over a year now, or since whenever I got these awards.

No matter what device I use, this always happens.

99% of the time, for some reason the order of my awards change

99% of the time its like this :

And I have to press CTRL SHIFT R (I use a Mac) to force the page to reload with no cache and it fixes the order.

After:

As you can see in the first picture the hacker craft award is on the bottom left, but after I reload the page it's in it's correct spot and the Liberty Reserve + 2 Hackercraft awards are perfectly in a diagonal line.

Why does this happen? ?

Oh wow man your life is hard with those rewards like if you giveaway some rewards I'm here I can handle few .

Same here your rewards in my screen is the same like always .

I can see the same order all the time, and that's the normal one.

They won't change for me. It's always in the right order.

I believe what you have is something called OCD, should get that checked out! xD

Maybe you are insane and all of those awards are going to your head. Maybe they've never moved at all.

Hasn't ever happened to me unless I've just not noticed, have you tried ignoring this very small issue?

grady - December 3, 2016, 12:12 pm

I've literally never had that happen to me.

That's actually rly odd.

Yeah. I just wanted to know why it happens lol.

Same sometimes my award is gold and then I reload and it's still gold?

wtf.

Soulmate~?? - December 3, 2016, 2:32 pm

Never seen that happen but maybe it's because some of them are loading faster or slower than others. One time I did have an award missing from my profile after I posted but after a few seconds it was squeezed back in between the other 2.

Omniscient - December 3, 2016, 3:15 pm

This is just minor cache glitches. I don't change the award sort order.
