I'm giving away this thread design, with .psd and all. I don't want anything in return.

I went ahead and cleaned up the .psd into groups, but it's still somewhat messy.

The two fonts used are called Infinity and Whola, so I recommend downloading them from dafont before you try and load this thread design.

Do with this design as you see fit, it's an original from Nevieth.

Looks really good, im sure someone will get a use out of this. You should've maybe added a little more space for product information.

Haha yeah, I'll make sure to do that for the next one. :)
