Nice one dude :)

Tried it, but it lags on the other end nvm

1.) Your "before" speeds aren't slow.

2.) If you actually have slow internet, half of the time you won't even be able to use Rabb.it as your internet is too slow to use an RDP.

BTW, this is "good" for me. Download speed is usually .70

obilisko24 - December 7, 2016, 3:13 am

mostly it would be download cap

My internet speed (90% of the time) is a third of yours in terms of download and upload speed. I pay \$100/month, literal shit.

Bump, because this is a helpful thread

Essence - December 18, 2016, 9:41 pm

This was probably the shittiest post I have ever seen in my entire life.

Not really useful if the user has crappy DL/UL Speeds as the site won't help with that.

Some people dont have unlimited bandwidth.

This saves a lot of your bandwidth for stuff like YouTube Twitch Etc.

xHeaven - December 19, 2016, 11:06 am

Biggest fake shit what I've ever seen.

RCE - December 19, 2016, 11:12 am

i hope it will be helpfull thread ,,

Husnain5678 - February 28, 2017, 9:00 am

I know this is an old thread but maybe you could help me still.

When i oopen my room everything is blurred and i dont get the options only mavatar and face cam and mic!

Mata1337 - February 28, 2017, 10:33 am

HaH....very nice i never this before ;D Thanks bro

Not really much to explain when its this simple!

Kodaz - March 2, 2017, 2:21 pm

This isn't speeding up your connection... You're just using a server to browse on through rab.it. I use it to watch movies with friends etc

Dank memees.

This user should be exiled.

boboboy - March 3, 2017, 11:14 am

:D

Spoiler [\(Click to View\)](#)herez myLiltips :

just open 25 ssh connection on ur box, balance with proxychains or multi proxy .. done.
