Thread: [Color Palette with track bars](#)

Fortiond - December 7, 2016, 9:45 am

This is a Color Palette similar to the Color Palette found in Adobe pack.

You can choose two colors by changing the track bars or simply changing the values of RGB

Screenshots :

Now this is a nice release. If only that textbox matched the rest of the theme you were going for and if you put the # in it then it would be perfect. You could also have just used a label instead of a textbox, of course.

Zilog80 - December 7, 2016, 10:45 am

How is supposed to select blue in the 1st image or red in 2nd image?

For the 1st one you can only see green-red-orange-yellow colors.

Compare with this color picker:

code is messy and too long

elimagek - December 8, 2016, 9:58 pm

thanks thats nice and cool

GruntStyl - December 8, 2016, 11:01 pm

oh oh... Nice release :) I was wanting something like this the other day while doing some web design. Thanks for the contribution.

Now just make it live update while you slide the slider and it would be better.
