Thread: [\[INFECTED, DO NOT USE\] Let's mess with: Devil Crypter](#)

Purple Kief - December 7, 2016, 11:27 am

This crypter is infected with a clipboard changer. DO NOT USE IT!

Shoutout to _Devil for the code!

Welcome to episode two of let's mess with things.

Want more crypters? Want more in-depth videos? Let me know through a comment.

0:00 - 3:30 = Kief is his natural habitat

3:35m - 10:05m = Imminent Monitor

10:05 - 15:31 = Luminosity

15:31 - 22:10 = Orcus

22:10 - END = Nanocore

[Video: <https://www.youtube.com/watch?v=K9I-9jyNv74&feature=youtu.be>]

End result & Notes

Spoiler ([Click to View](#))

Seems like the crypter creates double processes upon elevating privileges. (Probably fixed upon system reboot)

Also creates a small delay for your executable even though no delay is enabled.

Enable NET 4.0 when crypting Quasar!

You MUST use Luminosity's startup if you want elevation to work after reboot! You might even loose your client if you don't.

Compatibility is perfect.[/color]

IM4 = Perfect

Luminosity = Perfect

Orcus = Perfect

Nanocore = Perfect

_Devil - December 7, 2016, 11:57 am

Yes we do have small delay by default to pass some AV runtime.
and thanks to you for posting this.

Nice video Kief, You should crypt Quasar haven't seen you made a video on it before. ?

Devil Crypter looks nice. ?

yotoprules - December 7, 2016, 12:09 pm

Nice video kief :) Keep making more!

KFC Watermelon - December 7, 2016, 12:49 pm

By the way, for admin elevation to persist after reboot on LuminosityLink, you need to use Luminosity's startup/installation.

CichyCichoCiemny - December 7, 2016, 1:49 pm

That's one really detailed video! Love it!

?

QINGDAO - December 7, 2016, 2:11 pm

What language is devil coded in?

CKkio23 - December 7, 2016, 2:41 pm

(Dec 7, 2016 03:11 PM)QINGDAO Wrote: [\[CITE\]](#) What language is devil coded in? Say C# in sales page ?

\$lick - December 7, 2016, 8:41 pm

You have a very nice and enjoyable voice to listen too, I have no interest in crypters but I watched the full video.

M O D E R N - December 8, 2016, 1:39 am

I personally have been using DevilCrypter for almost a month now and have loved it.

warpje - December 8, 2016, 3:41 am

Kief i Love your vids! I've used devil crypter before it's a nice crypter if you use .net it's a good way to go!

Keep the vids going!

DC w/ Luminosity
Luminosity Client Builder settings:

Devil Crypter Settings:

Ideal settings I've been using without any issues.

Using startup in LuminosityLink and Devil Crypter. Nice.

(Dec 9, 2016 12:44 PM)BzrK Wrote: [\[CITE\]](#) Using startup in LuminosityLink and Devil Crypter. Nice.
I know it's probably stupid but it works great for me.

M O D E R N - December 9, 2016, 3:01 pm

(Dec 9, 2016 03:02 PM)UKninja Wrote: [\[CITE\]](#) Tell me ... are all LL functions working properly like elevate Admin or anti malware for example?
For me yes, everything works just fine. The RDP could be better but it serves its purpose.

VirtualMon3y - December 9, 2016, 3:07 pm

(Dec 9, 2016 04:01 PM)flexforce Wrote: [\[CITE\]](#) For me yes, everything works just fine. The RDP

could be better but it serves its purpose.

Then LI startup is working and not devil crypters imo with your setup the way it is.... those functions don't work unless you have II startup enabled. What you think Kief?

Personally I wouldn't recommend it but hey if it works for you....

bzr? - December 9, 2016, 4:17 pm

Should always use your RATs startup methods rather than the crypters, other way round causes many unforeseen problems to bite you ass in the future...

VirtualMon3y - December 9, 2016, 4:21 pm

(Dec 9, 2016 05:17 PM)BzrK Wrote: [\[CITE\]](#) Should always use your RATs startup methods rather than the crypters, other way round causes many unforeseen problems to bite you ass in the future... Exactly.... the fact he used two is odd that it is even working. In this case tho if all of LLs features are working I say it's LIs startup that is working not the crypters.

I was just being polite asking Kief his thoughts.... I know I'm right hahaha ?

Purple Kief - December 10, 2016, 6:22 am

(Dec 9, 2016 05:21 PM)UKninja Wrote: [\[CITE\]](#) I was just being polite asking Kief his thoughts.... I know I'm right hahaha ?

We both know it's terrible lol. I'd test it myself but I'm guessing only 1 startup is working correctly. Even if it does work properly you're only increasing your chances at getting caught runtime sooooo. No. :)

Slavoj Žižek - December 10, 2016, 11:38 am

1. don't tick anything in II
2. use invoke, anti-memory scan and startup in devil (I'm assuming devil is using the undocumented antimemscan not PAGE_GUARDS, else invoke + antimem will not work)
3. don't use the disablers or add any type of persistence, chances are it will just add runtime detections

This is how I would do it to get the best out of II, also make sure to disable everything in the II builder. even the password recovery is runtime detected.

LastSession - December 10, 2016, 11:40 am

He gave you the source code?

bzr? - December 10, 2016, 12:22 pm

He means the license code for the program, see what you mean though ?

Essence - December 10, 2016, 12:29 pm

Just a suggestion, you should talk at the beginning of the video explaining what you are all going to use, and what you are planning to do in the video, then play some music in the background and speed the video up when you are doing pointless stuff like opening programs, creating stubs, etc. Seems like sloppy editing

bzr? - December 11, 2016, 7:00 pm

DO NOT USE THIS CRYPTER AT ANY COST. PROGRAMME IS INFECTED AND OWNER IS A SCAMMER.

<https://hackforums.net/showthread.php?tid=5491287>

STAY AWAY

Holy shit this is cheeky of _Devil...

#Skyline - December 12, 2016, 12:59 am

Bahahaha purple kief you failed.

Your review didn't cover the factor it steals BTC from customers.
You need to freshen up on the skills buddy.

Nothing to fresh up on lol, this wasn't me diagnosing if something is infected or not. (which I'm also very bad at ?)

Thanks for bringing this to my attention, I probably wouldn't have noticed.

kevy42 - December 12, 2016, 1:18 pm

Next time can u check FUD'ness too :)?

bzr? - December 12, 2016, 2:19 pm

Kief I advise you to just junk this thread now, no one is going to use this anymore :(

warpje - December 12, 2016, 2:55 pm

(Dec 12, 2016 03:19 PM)BzrK Wrote: [\[CITE\]](#) Kief I advise you to just junk this thread now, no one is going to use this anymore :(Why? Now more people can see it!

poufpater - December 12, 2016, 3:04 pm

yeah leave the thread up, if this is true, then the more people seeing this the better.
damn thats a sneaky one !
