Thread: [Is there something in windows ten that can get in the way of charging?](#)

The Pact - December 8, 2016, 1:36 am

My new Lenovo laptop that has windows 10 just says laptop plugged in but not charging and nothing I can do will make this go away. I am used to Windows 7 and 8 on my desktop.

Dritz - December 8, 2016, 11:25 am

How old is it, and are you using the original power adapter?

The Pact - January 3, 2017, 11:25 pm

It was brand new. This issue turned out to be a Lenovo setting for old people that use their laptop like a desktop and leave it on the charger all the time killing the battery. They set it so you can only charge it to 59%.

You can probably raise that number to 90%, but if you leave it plugged in all the time there is no reason to.

I bought it to use as a laptop not leave it plugged in all the time.

Then change the setting. It's there to prevent your battery from being ruined.

The Pact - January 5, 2017, 10:12 pm

Neither I or anyone at the shop I bought it from could figure out how to change the setting in the end they brought the technician in to figure it out.
