Thread: [Need help with filtering text from listView](#)

AspectModding - December 9, 2016, 12:03 am

Hello there HF, I am looking for some help with filtering certain IP address from an listview, the listview pull data from an database which I made. The issue is some IP address I would like not to appear into the listbox. Iv'e tried the following from button

```
if(listviewbla.Text.Contains(process.start("url").toString()))  
{
```

```
    make ip show as invalid or some sort of text  
}
```

for some odd reason this doesn't work, do you have any ideas on this please :).

Why use process.start?

Here's how you check the item of your ListView.

[https://msdn.microsoft.com/en-us/library/y3h4x385\(v=vs.110\).aspx](https://msdn.microsoft.com/en-us/library/y3h4x385(v=vs.110).aspx)
