Thread: [AV Process Killer \[FUD \]](#)

vfragtasticv - December 9, 2016, 2:17 am

Hello hack forum users !

Created simply temporary av killer.
Its just try to stop av processes. [1 detect]

Task kill to kill avs?

Madam - December 10, 2016, 11:04 am

hahaha. your vbs is very simple with only taskkill. did you check it against real AVs yourself? you should be get failed.

Becasue most AVs has self defence. you can never taskkill their processes, write anything into registry and directory as well.
you are fucking hf guys.

I am not saying this will terminate av :DD

I am just saying its av task kill script. you can add by yourself if you want terminate av :D

Task kill to kill avs?
spooky hacker stuff

JoshuTee - December 10, 2016, 11:40 pm

This might have worked back in '05, but nowadays there's av self protection.
