Thread: [Watch me trade! - Stock market - Daily Updates](#)

Al-Bundy - December 9, 2016, 7:56 am

I know most people in HF are really not into trading, but to me, trading is one of the best methods to make money. If you know what you are doing (and bit lucky) you can make LOT of money.

I will be posting updates everyday on whether I win money or loose money.

I will be updated the post everyday with my trades. I'm done with trades today. Made more than enough for one day.

I'm confused how this works. You bought 3800 shares, but sold back 4500? I thought shares go up in price, not give you more shares.

You can also lose a lot of money.

Congratulations mate, hope you invest that money back into it too.

I was holding 700 shares from yesterday. 3800 more were bought and sold today.

Thanks! Of course you can loose. Chances are, I probably will loose a lot. It's matter of risk management. How much you win compared to how much you loose. Everything I earn or loose is going to be invested back into the market.

Sentence "If you know what you are doing (and bit lucky) you can make LOT of xy" applies to almost anything in life. Anyway, congrats on your earnings. How hard it was to earn so much money?

Mom - December 9, 2016, 8:11 am

I'll check back to see your progress, good job so far mate.

Just one hour. Technically half and hour after market opened. I traded half hour before markets opened.

That's pretty crazy man.

I've always wanted to get into the stock market, but shit looks hella complicated.

?now - December 9, 2016, 8:26 am

damn man thats a ton. Would you ever be willing to help people out with getting into stocks. Extremely complicated shit lol

flyingmustard - December 9, 2016, 8:28 am

Added to bookmarks to see how ya doin' :D

Absolutely. I was thinking about starting classes and doing live trades for people as well so they can follow. Maybe make some extra money on the side.

Today has not been a good day for me so far. This happened due to having a bad broker. I bought 2000 shares aftermarket and for some reason, my broker decided to cancel my ability to sell aftermarket. Hence i was not able to sell the 2000 shares which pulled even more before I could sell it. I occurred a \$1000+ loss.

However, my second trade, I made \$380. (Reason it shows \$205 is because i currently have more stocks in hand and is not reflecting realized gains.

Hopefully tomorrow will be a better day.
