Profit/Losses (estimate): Hard to say as I have been Gambling for a little over a year and a half

now. As all gambling, it goes up and down. I can definitely say I am probably in the profit around \$600 all time as I tend to bet small on longshot bets with huge returns.

Sweden

I play mostly blackjack and roulette at betsafe.

Depends on how it's going. I have a set amount, and if I lose that early in the month then it's no more gambling for the rest of it. But I will still talk about it and give advice of course. It's just that I have a set limit so I can survive the month.

-1000€ ish

Well the reason I'm back 1000€ right now is that I got kind of cocky and put 1000€ in one hand. Which is unfortunate, but it was worth the rush and potentially winning :D

## [BUST A BIT PROFILE](#)

I gamble whenever it is responsible for me to do so. Usually I hit up bustabit a couple times a month or maybe a little more. Haven't as much lately because I'm saving for holiday presents.

With the combination of bustabit and satoshi I'm probably only 50 dollars ahead lifetime. I like to bet big when I get ahead. I'm more into it for entertainment then the profits.

Whenever I have spare BTC laying around.  
Profit/Losses (estimate):

I've recently deposited 8k bits on my bustabit account and managed to profit 30k bits. Stupid me decided to go for 50k but dropped back down to 3k profit shortly afterwards.  
Whenever I'm online I manually bet, but when I'm away or sleeping I'll be using a script.
