Thread: [CodeJock Xtreme Toolkit \(download\)](#)

Neroxan - July 17, 2010, 4:57 pm

This is a copy of cojejock xtreme toolkit that I found on # through a link on a warez site.

Its used for vb6(& other languages) design. If you have a source that this was used in but dont have it yourself, then you cant see whats on the design part without it.

For examples of what you may see in an instance like this check these 2 threads

<https://hackforums.net/showthread.php?tid=548778>

Im not 100% sure that its clean, but I checked hjt before installing it and then once more after installing it and there were no new registry or startup entries so I think that its clean.

However, if youll scan the keygen @ VT it shows many trojan type detections. Because of this I ran the keygen sandboxed and copied a bunch of them onto a textfile so everyone wont have to run it.

enjoy?

Thanks cool dude ! Thanks, this will solve my problem !

Neroxan - July 17, 2010, 5:25 pm

np dude, just remember after installing it to go to start menu, then to codejock folder & use the registor or whatever its called to register the files or it still wont help.

Its Hf, unless the title has "keylogger", "free" and "FUD" in it, thats the way things go. But, its cool with me. Half of the crap I upload is just to back it up & save me some space anyways. lol

SkyRider - September 9, 2010, 5:44 pm

thanx for this bro nice share ??

codepoet - September 9, 2010, 6:12 pm

thank you very much sir.... i have been looking for this for a while now.
