Thread: [SMTPlib with Proxy](#)

**JohnFKennedy** - December 10, 2016, 1:58 pm

Is there a way to rotate proxies with SMTPlib?

Is there a way to use proxies with smtplib?

Thanks for anyhelp i can get on the issue! :)

**Hexi** - December 10, 2016, 2:10 pm

You can use PySocks for this i think :)

**xthanos** - December 11, 2016, 3:03 am

PHP Code

```
<?php
```

```
import smtplib
```

```
import socks
```

```
#socks.setdefaultproxy(TYPE, ADDR, PORT)
```

```
socks.setdefaultproxy(socks.SOCKS5,'proxy.proxy.com', 8080)
```

```
socks.wrapmodule(smtplib)
```

Worked for your application? If not, post the error or describe the problem.

Hey Anubis.

Sorry for the late reply but yes it did work. Will post my work on github and share it here soon :-)
