I'm selling Beps EK - 7 days access, comes already setup, you will get access to panel, the EK iframe code to input into index.php, and access to vps (w/ root) until EK expires (vps specs:
Intel Xeon E3-1240v5 3.50GHz
16GB DDR4 RAM
500GB HDD
5 GB/s DDoS protection
Offshore and proxy installed on server
Unlimited Traffic

Also it comes with a very legitimate unique looking site coded in php (or you can add your own as you will have root access to the VPS)

The original price is \$600 for 1 week but I will sell it for \$50 BTCs. This is a steal price. If you were to buy everything by itself, the vps, and domain it would be around \$70+. This is on top of the \$600 standard price!

If you don't trust me we can use a legit middleman to hold your BTCs throughout the 3 days of using it. PM me if you want to buy.

Price lowered to \$50 now!
