Thread: [Looking for a Node JS developer \[Quick and easy Job\]](#)

Baitable - December 11, 2016, 5:17 am

<https://libraries.io/github/moneypot/bustabit-webserver>

I want to get that source working, having some difficulties, If anyone could do this for me I'd pay 5\$-15\$, so cheap because it's only making the source work, no further action will be needed. other links:

<https://github.com/moneypot/bustabit-depositor.git>

<https://github.com/FuzzyHobbit/bustabit-webserver>

<https://github.com/FuzzyHobbit/bustabit-gameserver>

Are all the things I need to get done, I have it set up but there seem to be some errors [a lot] which i don't know how to fix :/

If anyone could help me that'd be awesome, from there on I could hire new devs to add more functionality!

Thanks in advance!

?
