Thread: [AvessoVision - \[Free\] High Quality Signatures](#)

AvessoVision - December 11, 2016, 7:38 am

This is my first actual thread I think, and the whole idea is pretty simple.

Haven't made a signature in a long, long time, but I started doodling around and I've said to do some good this month.

Quote:How do you request? There's only one step to this.

All signatures will be made at 450x150 and you are not allowed any revisions.

Go to PlanetRenders . net and pick yourself a render and drop it here.

Signatures will NOT have text on them, they are simply in your signature bar just to look good and sexy.

All signatures will be unique and you will have full control over them once you receive them. (If you're gonna credit me, that's because you're cool and you appreciate people's works)

How can we know you are the real deal?

Well, here's a tag I've made in under 10 minutes right now

Hey buddy.

Here's my render: <http://planetrenders.net/renderers/minion-hitman.68422/>

Thanks in advance.

Lemme see what you can do with this.

<http://planetrenders.net/renderers/lil-wayne.69134/full>

Im looking forward to seeing the result.

If you could throw in a matching avatar that would be awesome. If not its cool.

Wasn't fond of the render because of it being complete white and even smart sharpen messes with it but just a little bit. Although, there you go!

Cheers.
