I'm not sure I understand the purpose of what you were doing, are you saying Interwebz staff locked your thread so Interwebz sucks and Carbonized didn't so Carbonized is good? Honest question.

No, he is "asking" the people that is asking "which cheat is better" for what answer they are expecting when they are asking on a providers site.

example going on platinum people will most likely say plat is better (even thou it doesnt have faceit psilent)

going on aimwhere will result in people saying aimware is better etc

Not at all, mate.

I'm ranting about the people going on providers and asking if a different provider is better than the

provider they're on.

Say we're on your forums and someone makes a thread "Which hack is better? Chods or this cheat(LM)"

Of course your forums is going to say your hack is better; otherwise, why the fuck are ya on it for mate?

"Aimwhere"

All body mate, PolakWare can't hit heads.

This happens on just about every forum cheat related or not. We allow people to talk about other cheat sites on our forums but we do not allow baseless bashing. This promotes fair discussion about facts rather than opinions. For example, if somebody comes to our forums and asks the question "which cheat is better Platinum or Leaguemode" we allow this thread to stay open but if one of our customers says something like "Tristan is a copy pasting skiddo" they will receive a temporary ban and their post will be removed.

Most cheats sites do not allow this type of discussion or in some cases (leaguecheaps) they only allow discussion of other cheats if it is negative... Talk about insecurities.

It's not just the dissing of the cheats, it's the fact that people would be on Platinum's website because they enjoy the cheat compared against every other cheat so of course if you ask PlatinumCheats's forum which cheat is better between LM and PC, PC is going to be the cheat that's most loved because it's PC's forums.
