8 Ball Pool Hackforums Edition

Version 3.7.4

Features

Unlimited Guideline

Anti-Ban (Use dummy account just in case, but I have been using for a week with no ban)

Hackforums theme

This is the first time I have attempted creating a modded apk, this took me a really long time because I had no tutorials to go by, so if you could leave some feedback it would be greatly appreciated ?

Amaaaaaaazing .. you are awesome :D

thank you so much for your incredible work

I have two things here

firstly, it's a suggestion .. could you please make the guideline work for the table sides? and/or for balls if they will hit each other?

I guess then the game will be super awesome :D

secondly, I have a concern, I can't login through my Facebook account :(

Yet, I appreciate your hard work and your great efforts ^_^

Unfortunately, I don't believe that it is possible to make the guideline how you suggested but I will mess around with it also regarding being unable to log in via facebook, It is a bug with the anti-ban but I am in the process of trying to resolve this issue.

Thank you for your feedback and please report any bugs or issues that you find.

It will be great if you make it work with facebook.

I am playing the game and totally enjoying it

thanks again and please keep being awesome ?

HFETHANN - December 12, 2016, 10:31 am

Pretty dope, time to try it out.

IAmNoOne™ - December 12, 2016, 10:50 am

i would love to get this one too? "guideline for the table sides?"

can you please change the ball colour?

everything is fine but why you changed the colour of balls?

i mean WHY?

EDIT : i dont like it just because OP changed the tables too. play sydney and you'll know what i'm talking about. no aim is way better than this modded pool.

TheSnake91 - December 12, 2016, 8:53 pm

WOW that looks amazing, i don't think i can lose a single game while using that (; Thanks mate you're awesome

Basti - December 13, 2016, 6:08 am

?????s? - December 15, 2016, 7:22 am

Dumb question.

Can I download this on android?

Bershofisky - December 15, 2016, 11:04 pm

Hey there, most of the time it shows that I am waiting for opponent. . I think that this not an actual delay from the opponent's side, so what do you think ??

Also, do you have any news about the Facebook login ??

LookerUpper - December 16, 2016, 2:18 pm

Hey everyone, sorry I have been inactive for a few days. Some people are reporting that it is working with facebook while others are saying that it isn't. I have no idea why this would be but I am looking into it.

Also regarding the colored pool balls, I realize some of you don't like them I was just trying to go for a hack forums theme but I will release another version soon with unchanged balls.

Thank you all for your feedback

Thank you I did not intend to put that table, I reached out to a friend of mine for a template to edit the table to a hack forums theme but decided not to do so; I must have forgotten to remove the template.

Will update with fix.
