Thread: [8 Ball Pool Hackforums Edition APK \[RELEASE\] \[LATEST\]](#)

LookerUpper - December 11, 2016, 3:44 pm

8 Ball Pool Hackforums Edition

Version 3.7.4

Features

Unlimited Guideline

Anti-Ban (Use dummy account just in case, but I have been using for a week with no ban)

Hackforums theme

This is the first time I have attempted creating a modded apk, this took me a really long time because I had no tutorials to go by, so if you could leave some feedback it would be greatly appreciated ?

Screenshots

Could you teach us how to install this for android. Also can this work on the pc version also? Or do you have a pc version. Thanks!

LookerUpper - December 16, 2016, 2:25 pm

This is for Android go into settings and enable downloads from unknown sources, then click the download link above, once it is finished downloading click it and install just like you normally would. Feel free to message me if you require help.

X App not installed.

Failed many times.
