Thread: [T-shirt Website Revamped](#)

FakeTrumpTweetsiOSApp - December 11, 2016, 4:23 pm

Hey guys I'm looking for feedback on my newly revamped T-shirt website over at <http://www.blazingtshirts.com>. I have just added some opt in plugins as well as a few other user friendly things to increase the overall traffic and maintaining good relations with customers. Any feedback is much appreciated.

B?ker - December 11, 2016, 4:25 pm

Honestly, anything I highlighted in red should either be removed or re-vamped,

<https://i.imgur.com/sA21fDO.png>

Overall I think this site needs some enhancements.

1. Get a real logo pls.
2. Get rid of that special offer or atleast customize it so it doesnt look like 2006 myspace.

- +The generic text.
I don't know why, but it looks unappealing.

Nice Net Bro - December 11, 2016, 4:27 pm

Sorry to tell but the lack of a nice logo and the text style isnt apealing at all

Ancestral - December 11, 2016, 4:30 pm

Something like this is much better man.

FakeTrumpTweetsiOSApp - December 11, 2016, 4:32 pm

Thanks for the feedback. Yeah I just added the email subscriber plugin a little while ago. I agree with the logo and better text but I don't have the skills to do so myself. I think a fire kinda text would suffice. Thoughts.

FakeTrumpTweetsiOSApp - January 4, 2017, 10:21 pm

Well how about the T-shirt designs folks? Lol, they garbage also or is ebook whoring a better income?

Tid?es - January 4, 2017, 10:22 pm

Well.....it's wordpress

FakeTrumpTweetsiOSApp - January 4, 2017, 10:33 pm

Yeah I know but my HTML skill is garbage. Especially building from the ground up.

jsmith492 - January 11, 2017, 5:08 am

1. Logo
2. Text change (something a little more modern - these are... interesting shirts. Use an interesting font too.)
3. Get rid of the ads. Unless you're not looking for a clean professional look.
4. Get rid of your sidebar on the shop page - or at least make it do something productive. Like, use it as a showcase for other products. Or it could be a widget that includes their cart.
5. Make a banner slider. I personally like the Revolution slider. Others may disagree, but I like its layout.
6. Make a footer. Use it in sections to have internal links in addition to your main menu at the top.

If you need help let me know

Very good input. Much appreciated. I will be in touch.

Not Your Average Orange - January 11, 2017, 1:45 pm

Maybe add shirt categories? The ones on the front are a little bit too dark for the average user..

kushkaripordhi - January 12, 2017, 3:42 am

It doesnt look that good when I visit the website with my phone.

I've revamped the website so it should look better on a mobile device. Been too busy working with my iOS app, Fake Trump Tweets on the iPhone. Link is in the sig. ?

j10max - March 14, 2017, 6:58 am

Needs a bit more character, but the structure looks good!

Yeah its been a while since I've worked on it since being busy with my iOS app, Fake Trump Tweets and it's website <http://www.faketrumptweetsapp.com>

FakeTrumpTweetsiOSApp - January 21, 2018, 8:59 am

Revamping my website again as I've been adding new inventory and such. More suggestions are welcome. I'm working on a better shop theme at the moment. Any shirt design suggestions are welcome as well.

TaylorCTU? - January 21, 2018, 9:37 am

You have good shirts. The website takes away your credibility. If I were you I'd try to create something like this. <https://www.snorgtees.com/>

FakeTrumpTweetsiOSApp - January 21, 2018, 9:49 am

I like that theme. I'm curious why the website takes away credibility though.

Dynmap - January 21, 2018, 3:31 pm

looks nice now, pretty cool man gj

FakeTrumpTweetsiOSApp - January 21, 2018, 3:38 pm

Hey thank you. I just added some cool new items that are trending now.

It did look pretty basic, plain, out-dated. When someone has never heard of your brand and your website looks like you don't know what you're doing they're not going to trust you enough to place an order.

However, the new theme is much improved! Looks pretty professional! Great job.

FakeTrumpTweetsiOSApp - January 21, 2018, 6:52 pm

Cool thank you for the honest feedback. I'm working on building a good brand and trying hard to make it as professional yet fun as possible.

Trey Songz - January 23, 2018, 7:48 am

Hey what do you use for drop shipping? Could you PM me.

FakeTrumpTweetsiOSApp - January 25, 2018, 2:08 pm

I press my own T-shirts but am looking into drop shipping for other items.

Mr. Man - January 25, 2018, 11:07 pm

I don't like the header and footer the one with wooden texture in it. I would prefer if it was in shades on white like gray or something else.

FakeTrumpTweetsiOSApp - January 26, 2018, 2:03 pm

Yeah I'm certainly changing the header when I get done working and get to my laptop.

Finally got to my laptop to fix the header to a solid color. I still have work to do but getting it going now.

Had to rebuild entire website. Still adding T-shirt designs but I think it's better than the last site to be honest. I still need a sweet logo and tweak a few things but it's getting there I believe. Have at the feedback by all means.

Geatzo - June 2, 2018, 5:11 pm

FakeTrumpTweetsiOSApp - June 2, 2018, 7:25 pm

Yeah no I know I'm still kicking around with themes and such adding more designs and inventory. I appreciate the feedback. Wish I knew more html rather than WordPress to customize my ideas.

Snappsh - June 3, 2018, 6:29 am

Just a few things to consider.

Theme - Fury woocommerce theme PM me for link.

Logo - use canva.com if you have no experience with design.

Sidebar - should only be on product page with cross sell or up sell.

Banner/Header - Take a pic of your own or use pexels.com

Plugins - auto currency converter, social sales pop up (beeketing), newsletter pop up.

I have more but will list later.

FakeTrumpTweetsiOSApp - June 3, 2018, 8:22 am

Thank you for the feedback. I just messaged ya.

FakeTrumpTweetsiOSApp - June 8, 2018, 6:40 pm

Just added 10% coupon codes to all orders over on at my website www.blazingtshirts.com using the coupon code Blazing on all orders. Enjoy

Snappsh - June 9, 2018, 10:14 am

Make the header full width my man, and parralax, also download plugins for recommended products and cross/up sell/

FakeTrumpTweetsiOSApp - June 23, 2018, 3:46 pm

Thanks I'm back to tweaking things now.

Gushyz - July 3, 2018, 12:43 pm

The image at the top is off centered and maybe on the image you can put the name of the site which I think would look nice

FakeTrumpTweetsiOSApp - August 11, 2018, 5:54 pm

I think I've fixed everything for the most part.

FakeTrumpTweetsiOSApp - August 19, 2018, 5:12 pm

I just added a sales section as well as crude humor you love category. Things are getting there in between my 50hr work week.

Zain - August 19, 2018, 5:23 pm

Need a more professional logo and theme. The site load speed is also painfully slow.

FakeTrumpTweetsiOSApp - August 20, 2018, 2:50 pm

I agree. My design guy is wicked busy on a few app projects so I'll have to hold off unfortunately. The speed I'll have to look into. Thanks for the feedback.

Thanks for the feedback.1. It's a wordpress site

2. [It's a premade theme](#)

3. [Go figure, it's a free theme](#)

This website is nothing to bat an eye at.

Cobalts - August 23, 2018, 5:04 pm

Site logo is covered by social media buttons on mobile! Very hard to traverse site on phone.

FakeTrumpTweetsiOSApp - August 23, 2018, 5:26 pm

Thank you for pointing that out. I just got outta work so I'll fix that now.

Expliciet Limited - August 29, 2018, 6:25 am

Nahh bro i don't like it, concept is cool but not done properly in my opinion i also dislike the header, it's blurry on my screen tho

Ludicolo - August 30, 2018, 6:16 am

I certainly gotta find a better theme along with a possible plug-in to change tshirt colors when a different variation is picked.

FakeTrumpTweetsiOSApp - December 20, 2018, 4:48 am

I've made several adjustments to the website so I'm looking for feedback from its current standpoint in terms of design and T-shirts. Any suggestions are more than welcome.

Well the products and the Design is not teh problem, the loading speed is the major point where you will lose many customers.

Yeah, the website takes a very long time to load.

HOMODIN - December 21, 2018, 5:48 am

For once I actually scrolled trough the comments to see if this thing has been said, either I have missed it or then it's actually something that no one has yet commented on.

[This](#) image gets resized so that you can actually see the pixels, if I were you I would remake the same image but with a much higher resolution and then just "downscale" it in the html/css file so that it doesn't break up and turn low-quality.

Aside from that pretty much all other things that I can see there have been commented on...except for the fact that the page loads very slowly for me and no, it's not my connection speed that causes the slowness.

Kayvh - December 22, 2018, 5:46 pm

RIP your email, not sure why you have your personal on the website for everyone to see it will get spammed af.

FakeTrumpTweetsiOSApp - January 2, 2019, 8:44 pm

I'm trying to get the email situated however the theme is a pain in the a** when it comes to that in the settings. I'll have to hide it with a short code.

theglobemasters - January 3, 2019, 6:30 am

I went with the orange with the thought of Blazing and fire but I see how it is a bit dull.

I think going with orange is fine. Just not the tint you went with. I'd honestly recommend going with a more vibrant, in your face orange, if you're going to own it as part of your branding. Given the whole "Blazing T-Shirts" name, I think you can get away with a strong orange or red primary. Just be careful with how much you use it. Oranges and reds are aggressive and difficult to get right. You won't want it everywhere, nor will you want it to be used in large amounts (i.e. the background color of a big section).

The CTA area on your homepage (free shipping / highest quality / our location) is poorly setup... should be centered out. An easy way to accomplish this is the use of flexbox. Define the UL as a flexbox, give its align-items property a value of center. And also define the DIVs inside each list element as a flexbox, with justify-content as center.

k0xhf - January 14, 2019, 4:55 am

Your website looks pretty good and I'm pretty sure people will end up buying from your website.

However, just pointing this small alignment issue out here:

gyazo.com/f854ba457472aac399e271b3e7488c97

Also, when navigating to a new page on the shop, it takes a long time to load. Maybe try improving your load time there!
