Thread: [Selling Preloaded Mercari Accounts](#)

diesel - December 11, 2016, 4:34 pm

Back with another Mercari credit thread, this time better than ever!

F.A.Q

1) What is mercari?

Mercari is a marketplace very similar to ebay where users buy/sell items and leave feedback.

2) What is this service?

This service provides you a preloaded mercari account with credits, which can be used to buy anything on the marketplace.

The optimal strategy which can be used with these preloaded accounts is as follows

Requirements

- 1) Your own mercari account
- 2) Preloaded account with credits
- 3) Patience and a brain

Steps

- 1.) Find a seller of an item you wish to purchase
- 2.) Contact the seller with your own account, tell them you'll buy their item only if they're able to ship it out ASAP (within hours)
- 3.) Once you come to an agreement, simply login to the preloaded account, and make the purchase, hopefully the seller makes good on his word and ships the item out very quickly.

My partners have been using this method for a while and have been having 95%+ success rate.....

Prices (in USD)

1x 100 Credit Account - 40 BTC each

1x 300 Credit Account - 110 BTC each

2x 500 Credit Account - 170 BTC each

Will have more accounts tomorrow

I will provide replacement should you encounter problems (provided you use the above mentioned 'safest' method)
