Thread: [Scammed by Devil Crypter AKA "_Devil" UID= 3116961](#)

©Ratatouille™ - December 11, 2016, 5:59 pm

Hello today Guys i make a video for proof _Devil use a BTC adress changer in Devil Crypter for stole your BTC.

the adress used for recover stolen bitcoins is:

<https://blockchain.info/fr/address/1GBtXveZEfMSPDFcgm5fom4ztMtox86EZx>

I make a video in this video you can see:

- The process of the crypter "DC.exe" stay in process list after close the crypter
- The code used for change the adress in the clipboard.
- The adress BTC changer in action.

[Video: https://www.youtube.com/watch?v=YjEw16Ms_V0]

This Guy stolen me 250\$

<https://hackforums.net/showthread.php?tid=5423090>

debug - December 11, 2016, 6:00 pm

Vouch. Can confirm I saw the source code over teamviewer, and it indeed appears to be infected.

Cecilia - December 11, 2016, 6:01 pm

Thanks for letting us know about the issue. It is indeed infected. Very cheeky.

Backopy - December 11, 2016, 6:05 pm

omg i wonder how many other crypter owners are doing this! how scary would it be if someone really skilled deployed something like this, or even something worse and nobody ever knew?

cant trust anything these days

Scapula™ - December 11, 2016, 6:12 pm

He stolen me 20\$

<https://blockchain.info/fr/tx/9b8f4a8f0260e1b3bdd31363e7b793bee2aa18b6e1b6baea2d2a1cbc2578896a>

Stupid Guy ?

SIM-2114973 - December 11, 2016, 6:13 pm

Wow, done many exchanges with Devil, didn't expect this.

THC - December 11, 2016, 6:29 pm

Wasn't there already issues with Devil being infected?

Nice warning though.

Forc?d - December 11, 2016, 6:30 pm

Nice one OP, infecting members = instant ban.

Koopa - December 11, 2016, 6:34 pm

This is very suprising...nice find.

Insolvent - December 11, 2016, 6:56 pm

Holy shit I was about to buy that crypter, and I had a large transaction today of 2k. Would literally shot myself if I would sent it to his address.

©**Ratatouille™** - December 11, 2016, 7:27 pm

If anyone wanna analyse it, pm me I'll give you the BIN.

Sadistic - December 11, 2016, 7:37 pm

(Dec 11, 2016 08:27 PM)©**Ratatouille™** Wrote: [\[CITE\]](#) If anyone wanna analyse it, pm me I'll give you the BIN.PM'd you. I would like to take a look into this scenario .

Six Double 0 - December 11, 2016, 7:38 pm

Damn! Thanks for letting us know about this.
This guy must have made off with a ton of BTC.
1,000th post!

Codefuser - December 11, 2016, 7:45 pm

PM me the bin please.
Thanks a lot.

Actually thought he was legit til now.

.Astro - December 11, 2016, 7:50 pm

I have to give the guy props. He did this very sneakily and who knows how long he's been doing this before someone caught on.

Twistd - December 11, 2016, 9:28 pm

(Dec 11, 2016 08:50 PM)inShane Wrote: [\[CITE\]](#) I have to give the guy props. He did this very sneakily and who knows how long he's been doing this before someone caught on.
Everybody knows how long he has been doing it. It's right here.
Start date:
2016-06-24 00:50:54
Number of transaction 39 -7 outgoing = 32 incoming transactions.

Theres nothing unique or new about this clipboard method.
It's pretty shitty to be honest.

If he had a brain he would hook the wallet and have it send the password somewhere.

Otherwise, well spotted :)

Go mp man !

Codefuser - December 11, 2016, 11:06 pm

Coded a stealer

Coded a crypter

FUDDed a crypter

Cannot remove 1 line of code.

welp

LastSession - December 11, 2016, 11:44 pm

Sad. You don't even need 30 lines of code to do what he did.

I feel sorry for you and for the other ones who lost money.

Scapula™ - December 11, 2016, 11:53 pm

Stop with your pathetic excuses your are harmful. Enjoy your ban.

DopplerAF - December 11, 2016, 11:55 pm

I feel really sorry for all those who got scammed because of this and the thing that amazed me is the reply from the owner he think people will believe his non sense.

Tee Plow - December 11, 2016, 11:57 pm

pm me and i can help you with that

however this look sketchy and no one will buy a crypter that is not even coded by the " Owner "

©Ratatouille™ - December 12, 2016, 12:03 am

(Dec 12, 2016 12:57 AM)Tee Plow Wrote: [\[CITE\]](#) pm me and i can help you with that however this look sketchy and no one will buy a crypter that is not even coded by the " Owner "Why pm you ? Don't need help i think ?

LastSession - December 12, 2016, 12:08 am

Three options:

1. Devil is lying (pretty sure he is)
2. The developer created the clipboard functions and Devil didn't notice it because he didn't check the code properly.
3. OP didn't notice it because he can't even code. Even someone who knows the basics won't notice the BTC changer except it's highlighted and commented in the code.

Skeetz - December 12, 2016, 12:13 am

How can you run a crypter and not even know how to code Imfao.

well you'd know because when you send money it wont go to the recipient, and you check the address...

VirtualMon3y - December 12, 2016, 12:52 am

Serious stuff here. Nice find Op. looks like a legit report.

M O D E R N - December 12, 2016, 1:49 am

Is there something we should scan or is closing the process good?

Rhez - December 12, 2016, 2:14 am

Damn. It's nice Ratatouille was on our side. He sure always beats the shit out of some sketchy here.

To _Devil:

You smell fishy right now. You've already coded stealer and I know that you're the only one who coded this crypter and yet, don't know how to fix that small part? Come on.

(Dec 12, 2016 02:49 AM)flexforce Wrote: [\[CITE\]](#) Is there something we should scan or is closing the process good?

Yes. Just close the process from what I saw on the code.

Codefuser - December 12, 2016, 2:17 am

I wouldn't be surprised if his stealer is a part of his crypter itself.

Backopy - December 12, 2016, 2:44 am

(Dec 12, 2016 03:17 AM)Codefuser Wrote: [\[CITE\]](#) I wouldn't be surprised if his stealer is a part of his crypter itself.

he's not that smart

taco85 - December 12, 2016, 3:43 am

So thats you, you stole my BTC. Please KYS
If anyone is interested i have devil's personal paypal.

Shanonnn - December 12, 2016, 5:45 am

Well, that escalated kinda quickly....

You better get in contact with the fucking coder..because this is just dirty...

I think you are lying Devil..but thats just my personal opinion for now.

Hope this gets resolved ^^.

F3sty - December 12, 2016, 8:03 am

Bump. This needs to get noticed

M O D E R N - December 12, 2016, 8:38 am

Well damn, any other crypter providers want to be super lovely and provide a discount for us Devil Crypter users? :p

ForceJew - December 12, 2016, 9:15 am

Would like to look at the bin and see what happend.

Thanks for sharing this info even tho I wasn't going to buy it.

(Dec 15, 2016 09:11 AM)_Devil Wrote: [\[CITE\]](#) I am still on this ship and try out to find a way.

Its easy to code a stealer compared to Crypter,

Cause making output FUD is the biggest pain and so only i hired a Coder to do that part and also teach me.

No its not coding a crypter is an intermediate project and even a beginner coder could do it.

Codefuser - December 15, 2016, 5:21 pm

LMAO for a stealer you have to figure out the storage method of all of the applications you are

stealing from, while for a crypter you just have to obfuscate the stub manually and slap some public RunPE on it?

Tommy Chong - December 15, 2016, 5:45 pm

How is this guy even still around?

It's completely obvious that he released the crypter with the intention to steal bitcoin from members.

It's nearly impossible to not notice malicious code within a project.

I also assume every dumbfuck would skim through the source code after purchase.

MrCortex - December 17, 2016, 3:02 am

_Devil you know this is not the correct way.

Now you defend your coder by not given out his name, I'm happy that I find this kind of pages before buying stuff.

Why not both? _(?)_/_

Malicious Intent - December 18, 2016, 9:10 pm

This is what's wrong with this forum.... Rules seem to only be enforced partially or only on some people.. my statement might not be fair in the staff eyes but thTd what it looks like to the avarage member looking at it from my perspective. People get banned coz they say stupid shit but this cunt clearly is infecting members and gets away with it. Smh

yea true

Armada - December 21, 2016, 8:13 pm

How the fuck do people think they are going to get away with shit like this on HF?

I mean we literally have hundreds of reverse engineers and developers sitting here trolling all day, every day, someone, SOMEWHERE is going to even get bored and look in to something questionable.

Retard... lol

Get rekt, fucking thief.

you havent posted since a week mate sup
you never even revealed your coder whos a potential threat to the community

unless its you ofc

not understand , enjoy infecting members ?

Geass - December 29, 2016, 10:11 am

shit there is something like that? really now?

sorry for your lose OP :(

IF you copy a text such as "hello" the paste still will be his btc address? :/

Tommy Chong - December 29, 2016, 10:14 am

How is this kid not banned yet? What the actual fuck

©Ratatouille™ - December 29, 2016, 10:15 am

Yep i exterminated this but the coder not banned , no refund , is not clear !
No if you copy any btc adress paste still will be his btc address , but if you copy "hello" you paste "hello"

yotoprules - December 29, 2016, 5:38 pm

No, it only changes the clipboard to his address when you copied an actual address.

©Ratatouille™ - December 30, 2016, 12:35 am

Thank you Omni banned him !!!

Well done bro. I can't believe it took so long to get rid of this guy. Good riddance the thief is gone.

Tommy Chong- - December 30, 2016, 3:25 am

Glad to see he got closed.
Thanks Staff

americanpal - July 28, 2018, 10:45 pm

I Read the topic and I will conclude just one thing by this DTA- DON'T TRUST ANYONE!
