Thread: [Challenge Number 7 - Tricky Challenge -](#)

InjectorBoy - December 12, 2016, 10:28 am

Hi EveryBody This Is The Challenge Number 7 - Tricky Challenge - Hope You Loved .

Target

PHP Code

<?php

<http://www.ipb-ild.edu.rs/institut.php?id=40>

Tasks

part one

make error ' only ' appear in site like me

part two

get all tables with your name in the same page

Rules

1- don't change the injection point

2- use union based only

3- pm me your solution

Proof

part one

part two

Solvers

1- Sir : JaNuS18

JaNuS18 - December 12, 2016, 11:14 am

Error on site, not on white page. I hope I understood that correctly

InjectorBoy - December 12, 2016, 11:39 am

?

JaNuS18 - December 12, 2016, 12:27 pm

Did you try union based on that site?

InjectorBoy - December 12, 2016, 1:21 pm

(Dec 12, 2016 01:27 PM)JaNuS18 Wrote: [\[CITE\]](#) Did you try union based on that site?

are you meaning sir I can bypassing the error :

The used SELECT statements have a different number of columns

and inject by normal way ?

JaNuS18 - December 12, 2016, 1:33 pm

No, I used different link. Try it for exercise. ?

P.S.

Most links on that site will give you that error.

in this injection point I get column number

but I can't able to appear column number in the site page I will try agian

pm you my query

(Dec 12, 2016 01:27 PM)JaNuS18 Wrote: [\[CITE\]](#) Did you try union based on that site?

I get it in the same injection point

PHP Code

<?php

<http://www.ipb-ild.edu.rs/institut.php?id=40>

Regards Sir

Maybe you opened your challenge to soon. Still you can change tasks so also other can go in that direction

P.S.

My invitation to exercise was good for you ? Now finish injection point I gave you as another exercise

InjectorBoy - December 12, 2016, 2:36 pm

update tasks sir

and thx for exercise sir

scorpoin - December 25, 2016, 12:14 pm

I manage to inject it via error based same url but failed to get injection via union , but I manage to get different num of column error message using union. But couldnot get all tables and column. Im nt allowed to pm so I wont sharing my error based but yes I would love to learn this . if you share the solution.

Code Duplicate entry 'kamenica_ipb1' for key 'group_key'

Regards

Scorpoin

redlightrouter - December 26, 2016, 8:20 pm

Are there any write ups? Would love to read how people do it their way.

Sorry, i can't send my syntax because i don't have necessary posts on this forum for this...
Maybe we'll find another way for this and i'll be glad if u can send me other solutions too

PS: i used id=40 as the injection point

Cheerz

scorpoin - December 28, 2016, 11:40 am

Dear Inj3ct0rBoy We all would love to learn if you could reveal the secret to us . Looking forward to your kind response.

Regards
Scorpoin

solved if you say so I may reveal my syntax here , since there is no activity nor I can send PM .

there is 17 column ;) vuln column is # 2 .

Regards
Socproin

InjectorBoy - December 28, 2016, 2:41 pm

soon I will add my solution to all my last Challenge

scorpoin - March 26, 2017, 2:33 am

here is your proof dear

part one:

Going to try the next part now.

Regards
Scorpoin

mr.vulnerable - April 14, 2017, 4:40 pm

id=-40%20having%20null%20UNION%20SELECT%201111,2222,3333--%20-

so hard for me can you pm me the code master :)

indianehacker - April 15, 2017, 2:05 pm

My Poc :
