Thread: [Memes=cancer? No. Memes=kills cancer](#)

Saney - December 13, 2016, 10:09 am

Anyone remember sportacus or wtf that shit was (my mate at school which is a refugee thought that the show was some deepweb shit or something when I showed him the memes).

But to the once remember the bad guy:

Spoiler [\(Click to View\)](#)

he has actually become a fucking meme after so many years...

Now he is an old grown man that recently survived cancer. He claims that when he was in the hospital bed, his wife or nurse (or wtf) brought him a computer to show him that he had become a meme.

He says that the memes helped him through the days and then he suddenly had been cured:)

Here is him today (this is actually him responding and telling about it, it is not a fucking pedophile):
